Here's the news bit. No part of this magazine may be reprinted or reproduced in any way without the express permission of the publishers. If you have any questions, we'll get our feature and readers on and enable you to sing (or shout) to the top of your lungs.

COMPETING INTERESTS STATEMENT: The authors declare that they have no competing interests.

No EMAP employees or their immediate kin may ever, but Gwynne also can, apart from Drayton Binion of Texas. Warned not because he is a complete and utter play-boy who spins tales. The danger is exactly the other, one who can't get things done. He shall be entered into the good will and mobile until you throw up, but may not be a bad person.

白粉、高土、草

Drummers coming on the scene as getting far less as he should. Because if he didn't the pace industry would be looking for the drummer and no massive spreading of his music. Maybe sure you know it or not. I AM A MACHINE people a little more so. A bit of extra brainy should get you a record - so here it is. The last card we got was from his sister a couple of months for his art his machine. So remember to put your name and address on the card. As well as the machine you can. In your last of art. My soul you see how to spread yourself from the capital of machine to his. Keep it simple. I am the heart of his machine.

**MAKE IT HARD
AND IT'LL LAST
MUCH
LONGER!**

One of the most important features of any game is the playability. Even if a game's got the greatest graphics and sound ever seen and heard, if the gameplay isn't balanced correctly, it's simply not worth playing.

Playtesting is the only way to get this right, and many companies in Japan spend months just having the game played over and over again so they can polish the gameplay and set the difficulty levels to maintain the challenge, yet not make it so hard that after a few games you give up in frustration. Likewise, they don't want to make the game too easy, so you'll finish it quickly and won't feel that you've got value for money from it.

The other way around this problem is multiple difficulty levels or continues. These sometimes help out but throw up another problem: players finish the

game on the national level, and then the game doesn't hold any more surprises for them, so they get bored. Or players use up all available continues to let themselves get as far as possible, and finish it quickly that way.

What do you do? If you get a game do you play it on easy end use all the continues? If you do, you certainly won't get the nicest out of it. Why not try it on (the medium level first without using continues, and then if you really do get stuck, you can lower the difficulty and even use continues to help you out. That at least you've had some sort of challenge out of the game, and haven't just breezed through it in an evening.

Think about this when you next buy a game - after all, you want to get the most out of your game as possible, don't you?

JAZZ GOES RALLYING

When software company Greenlin Graphics arranged to have our Jaz driven through the forests of central Wales in Toyota's special Rally Celica at speeds up to 130 mph by current British Rally Champion David Llewelin, you didn't see his backside for dust as he disappeared west at top speed. According to Jaz, the drive down the narrow, twisting dirt tracks was completely amazing, with David throwing the car sideways around corners at 100 mph! Did he like his day? You bet His main reaction was, "Nippin' amazing and I thought I was a nut!"

JULIAN "JAZ" RIGNALL
Faster than a speeding panajoner, stronger than a wet paper bag and able to leap tall matchboxes in a single bound, our Jaz isn't a superhero. He's just yer or nary everyday long-haired techno-hippy games addict who can't breathe 'cos his sleeves is all wrong.
CURRENT FAVE GAMES: JOHN MADDEN'S FOOTBALL, PANG, SOLAR JETMAN

MATTHEW "MATT" REGAN
Matt's been watching the Six Million Dollar Man in French, basking the Metro in Paris and zooming around France in a clapped-out delivery van - but it's not his fault. When he's not being treated badly, Matt likes to listen to the Cocteau Twins and play games on his Megadrive.
CURRENT FAVE GAMES: JOHN MADDEN'S FOOTBALL, FLYING SHARK, BATMAN (GAMEDOY)

GZ "I WANT JANET JACKSON'S BODY" BROWNE
Gz is Janet Jackson's number one fan, and would give his bottom dollar just to grovel at her feet. But when he's not daydreaming about the pester when he'll "meet" his idol, or staring at the poster he has of her above his desk, he designs all the pages in MEAN MACHINES.
CURRENT FAVE GAMES: JOHN MADDEN'S FOOTBALL, FLYING SHARK, STRIDER

GARY "FRIEND TO THE HOMELESS" HARROD
Gaz, or "cutley buns" as he's known by his hundreds of admirers, draws all the lovely pictures you see in MEAN MACHINES, and also paints the ver. He lays out pages and does a bit of photography too, but is never too busy to play the best games.
CURRENT FAVE GAMES: JOHN MADDEN'S FOOTBALL, GHOSTBUSTERS, GRENADA X

THANKS TO...

How Lowe can you go? Thanks too to the folks at the Electric Games of London for supplying us with Dynamite Duke! And finally, thanks to Hank for supplying us with all the film pics of Robocop

MULTIPLE ENTRIES

Oh! Some of you weazocks have been sending in loads of entries to the same competition. If you're one of those, take note of this. We don't accept tons of entries from the same person - and it's easy to find out when multiple entries have been sent in because we recognise the names, addresses and handwriting because we sort the post out ourselves! Just send one entry into each competition, and then everyone will stand a chance. If in future we spot a reader sending in multiple entries, we'll throw all their entries away. You have been warned.

PICTURE SPECIAL

Here's a pair of brilliant drawings sent in by two super-talented readers. The MEAN MACHINES one was sent in by J Blue, and the "Do yourself a favour" pic was drawn by Glyn James from Brecon in lovely Wales. Cheers for the drawings. We'll have some more.

THE RATINGS

RATINGS WORK

Here at MEAN MACHINES we are committed to giving you the most in-depth console reviews possible. Here's how they work.

GAME DIFFICULTY: This tells you how easy or tough the game is. If you're a novice player, easy games should keep you happy. If you're a veteran joystick-jockey, medium or hard games are recommended.

LIVES: Tells you how many times can you die and still return from this grave.

CONTINUUES: Tells you how often you can restart from where you died. Beware: too many continues can allow you to finish the game too quickly, and seriously damages your enjoyment.

SKILL LEVELS: Many games let you fix the difficulty level for yourself, so you can increase the challenges if you get good at it. This tells you how many skill levels there are.

RESPONSIVENESS: Is it humanly possible to avoid that mutant's death-beam, or does the joystick refuse to obey your frantic commands? This section lets you know!

PRESENTATION: This is an important part of any game. Are the instructions clear (and in English)? Do the option screens make sense and look pretty? Is the screen well laid out? Is there plenty of in-game info? This rating tells you all.

GRAPHICS: This includes not only the quality of the sprites and their animation, but the background as well. Graphics are judged not only on their prettiness, but on how well they are suited to the game.

SOUND: The difference between a booming, catchy intro tune and a few weak bleeps that sound like a dying Spectrum is indicated here. Music and effects can make a big difference to a game, so don't ignore this factor.

PLAYABILITY: Some games you just can't stop playing, no matter how late at night it is. This measures the addictiveness of the game, and how much you'll think about it - even when you're not playing it!

LASTABILITY: You don't want to spend your cash on something that will only last a week. Check this box out to judge if you are going to be playing it in a month, or be bored with it within a week.

OVERALL: This is it. This mark takes into account all the above ratings and acts as a guide to this game's overall quality. If a game scores over 90%, it's a Megagame and is well worth buying!

PLAYERS: Simply tells you how many players can play the game - either simultaneously, or one after the other.

ACTIVISION GO NINTENDO

As from the beginning of next year, Activision UK will be entering into the Nintendo market with a batch of titles that have been making it big in the states.

Scheduled releases on Gameboy include Malibu Beach Volleyball, Ghostbusters II and Heavyweight Championship Boxing - all previously available on import from Japan, but now fully translated into the Queen's English and ready to rock and roll in the UK.

On Nintendo there's Rad Gravity, a ten-level arcade puzzle shoot 'em up (weird combination, huh?) where you control Rad Gravity as he battles to defeat an evil warlord and unite a scattered planetary union, and Ghostbusters II, an eight-level game-of-the-film.

They all look pretty jolly, and we'll be bringing you a fuller report as soon as we can get our hands on the games.

MEGADRIVE EXECUTIVE CASE

Fed up of wheeling your Megadrive around to your mate's house in your Mum's scummy carrier bag with 'Big Shopper' on the side of it? Well, here's how to stop people from rolling about in the gutter in hysterics as they poke fun at your ridiculous sack, and instead swoon away with sheer admiration as you swank past: get a Megadrive carry case.

This swish, high-impact carrying implement holds your Megadrive firmly in place, as well as a selection of games AND a power supply. It's got the Sega logo on the side, a rugged handle and looks like a super-slick executive briefcase. It's available from PC Engine Supplies - if you're interested, give them a ring on 0782 712759.

SOME SEGA STUFF

Coming to a Sega near you very soon are two brand new titles, *Submarine Attack* and *Gain Ground*.

Submarine Attack puts you in control of a underwater craft whose mission it is to dive deep into the horizontally scrolling depths of the ocean and blast everything that gets in its way. It all sounds like gong, clean death dealin' fun, but we'll have to wait until next month to see how it plays.

The second title, *Gain Ground*, is a conversion of the obscure Sega coin-op in which you have to guide a set of heroes through a series of single screens, first grabbing a weapon, then shooting off the baddies and finally making it to the exit. It's a sort of one-screen Gauntlet with guns. The original arcade machine didn't exactly set the world alight when it was released a couple of years ago - well four weeks and you'll be able to find out how this Sega conversion fares when it comes under Matt 'n' Jezza's scrutiny.

GX4000 SOFTWARE RUSH

GX4000 console is about to shift up a gear at last, with a veritable mound of new software hitting the shelves just in time for Santa season. What are these titles?

Well, on the Ocean label there's *Batman*, the official game of the highly successful film, *Operation Thunderbolt*, the megadeath Taito coin-op conversion, *Barbarian II*, a great hack 'n' slash arcade adventure, *Navy Seals*, a game of the forthcoming commando film, and finally *Pang*, a highly addictive bubble-bursting arcade conversion.

Other titles include *Pro Tennis Tour* and *Tennis Cup II* (two excellent-looking tennis simulations), *Klax*, the colour-matching arcade game and *Greenie Graphics' Switchblade*, a platform game with rather bland graphics but utterly superb gameplay.

CONSOLES WE ONCE LOVED

NUMBER THREE: COLECO

When it was launched back in 1983, the Colecovision stunned the world with its (by early 80's standards) high-powered processor, big memory (32K ROM and 17K RAM) and graphics system that blew away all other consoles - and many computers - on the market at that time.

The range of arcade games was enormous, with early eighties coin-ops like *Burgerime*, *Cervival*, *Cantipede*, *Frogger*, *GORF*, *Gyruss*, *Mr Do*, *Mr Do's Castle*, *Popeye*, *O'Bert*, *Spy Hunter*, *Star Trek*, *Tappei*, *Time Pilot*, *Tutankham* and *Zaxxon*, as well as some excellent original games like *Zenji*, *Rock 'n' Bolt*, *HERO*, *Decathlon*, *Pittail II*, *Montezuma's Revenge*, *Mnei 2049'er*, *Jumpman Jr* and *Boulderdash*.

During the eighteen months following its launch, a load of add-ons were released for the Coleco, including a complete computer system with keyboard and cassette drives, a steering wheel and accelerator control pad, a VCS adaptor which let you play any Atari VCS games on the Coleco, a rollerball controller and a special joystick. However, this didn't save it from the dumpier when similarly priced home computers like the Spectrum and Commodore began to hit big in this country.

The machine is still available today from Telegames - they also stock a large range of about 180 games and nearly all the peripherals. At around £60.00 for the machine and with games costing between £6.00 and £30.00, it's quite an expensive luxury. But if you're one of those well-off gamers who hankers after old arcade conversions and console classics like the ones listed above, ring Telegames on 0533 880445 for more information.

M-I-C-K-E-Y-M-O-U-S-E

The World's most famous cartoon character, Mickey Mouse, is soon to appear in a Megadrive game, *Castle of Illusion*, for that is its name, is a platform-style game in which the lovable rodent is guided through screens and screens of hazard-packed action.

Judging by the screen shots and the wildly enthusiastic reaction from Japanese journalists who've already seen the game, Mickey Mouse looks like it'll be a massive success when it's released here early next year. We'll be bringing you more news next month - watch out for it.

DO WHAT?

A rather strange-sounding game, Blimini Run, is about to hit the Megadrive in the states. What is it? Well, it's a 3D shoot 'em up, rather like Roadblasters on water where you take the wheel of a high-powered speed boat on a mission to rescue your kidnapped sister from the clutches of evil Dr Orca. What this basically means is loads of blasting action as you cut a swathe through screens and screens of hostile enemy forces.

If the 3D action is as fast and smooth as Super Monaco GP, this'll be one to look out for.

IT'S A MONSTER

Fans of those ultra-crappy Japanese Godzillas B-movies will wet their knicks when they hear this news. Japan's biggest monster is soon to star in a Nintendo and Gameboy game!

The Gameboy title is a weird game, requiring you to take control of the eponymous monster, and crush, crumble and chomp your way through 64 different screens to find Manilla. The Nintendo version looks more like a scrolling beat 'em up, with everyone's favourite 5-storey high fire-breathing reptile smashing through the city and fighting his arch-rivals like Mottrix and Ghidrah!

Sounds like a veritable hoot to us - we'll be checking it out as soon as it's available in this country.

LET THERE BE LIGHT

Two excellent Gameboy accessories just released in the US are the Lightboy and the Game Light. Both, as you might have guessed, are clip-on light utilities that let you play the Gameboy in the dark - an occupation otherwise impossible unless you've eaten ten million tons of carrots.

Both require batteries to operate, but they last for yonks, and the Lightboy has the addition of a magnifying screen which makes the screen look even bigger, thus saving you from myopia (a push word for short-sightedness). If you're after something new to fiddle with under the bedclothes, check these both out - they're available now from all good import specialists.

Toaplan, the authors of Truxton and Hellfire, have just released a new game in Japan. It's another vertically scrolling shoot 'em up in which you take control of a time travelling high-tech bi-plane on a mission through ten time zones of mass destruction and mayhem.

There are plenty of extra weapons to pick up, including a marvellous super sweep-leser which offers an enormous kill rate. It's certainly good fun, and the only thing that apparently lets it down is the fact that it's easy to complete

NEWS

SUPER MARIO BROS. 4 MARIO WORLD

With the Super Famicom finally released in Japan this month, it's no surprise that Super Mario Bros IV is the machine's biggest-selling title.

It's basically another scrolling platform game, but with loads of extra enhancements - like the fact that Mario can ride four different dragons against the massed enemy forces. Featuring superb multi-level parallax scrolling, stunning graphics and loads of amazing features, this is easily the best Mario game yet - and that's saying something!

Unfortunately, Nintendo have no plans to release the Super Famicom launch in Britain as yet, but the machine is available from importers as we speak - expect to pay around £200.00 for it, and around £40.00 for the games.

Would you believe it? The Super Famicom has only just been released in Japan, and Sharp have gone one better with the SF1: a Super Famicom and television set combo.

One moment it's a normal television set - but stick a Super Famicom cartridge into the slot above the screen, plug in the game controller and press the remote control and - hey presto - it's a Super Famicom. What a brilliant idea, eh? No messy wires. No getting a machine off the shelf and plugging it in when it's game time. Just simple, hassle-free into-play at the flick of a switch. What a brilliant idea, eh? It only they'd make a British version. .

PUNCH IN THE MUSHIA

An up-the-screen scrolling blaster which will be released on the Megadrive in Japan early next year is MUSHIA. It's a fast, action-packed shoot 'em up with plenty of super-destructive extra weapons.

The graphics and sound are both good, but there's one flaw. It took us about half an hour to complete the pre-release game which we managed to get hold of. Hopefully this will be rectified before its launch - we'll fill in closer to the time.

▼ A running play in progress, close to the Offense's line.

▼ Forty-two Hutt Lots of chances for macho and nonsensical shouting in this game!

American football is a game of four quarters. It's rough, it's tough and only the fittest survive! Can you make the big time on the gridiron? John Madden Football gives you the chance to find out.

On the title screen there are a variety of options that let you choose a side from a list of the 16 most famous NFL and AFL teams or a John Madden All-Star team, choose whether the game is sudden death, a playoff or regular season, select one or two players, and set the time per quarter.

Once those are chosen, it's onto the game proper. The action is displayed in 3D, viewed from above and behind the offensive line up. As play happens, the screen scrolls up and down the field and also left and right in realistic multi-level parallax to follow the ball.

There are a huge range of plays available to the player, and are chosen using a series of easy-to-use menus. First of all the main team is selected (big, fast, hands and so on), which gives access to a variety of plays (shotgun, running, pro-form etc.). Once a play is chosen, a further set of windows open up detailing a variety of player movements. Choose one of those and play begins.

When the ball is snapped, the player takes control of the quarterback, who either runs or passes. If the ball is passed, player control is handed over to the receiver. Offensive moves are chosen in exactly the same fashion, and during the play you can control any player you like.

Although this seems quite complicated at first, it's surprisingly easy to get into, and the sheer wealth of plays and options made available to the player gives huge scope to develop your own playing style. And, if you've certainly got to do that to get to the Superbowl, so get practicing.

- ◀ Check out the opposition's stats before the game.
- ▼ Ready for kick off. An on-side is very dangerous, but can be worth it - specially if you're losing!

- ◀ Houston choose their Offensive play with 40 yards to touchdown.
- ▼ An attempt at a field goal, worth three points.

COMMENT

MATT

I've never been a fan of American football - after all, any game called football in which you carry the ball has got something wrong with it (unless you're Mardonnas, of course). But this game stunned all of us at MEAN MACHINES as soon as we saw it. The sprites are brilliant - all the moves are there, and the players jump, tumble and dive, just like the real thing. The sound is amazing as well. Wait 'till you hear the yell of "It's good!!" when you make the extra point, and the thuds and groans of the Defense as they hurl themselves at the running back. Despite all these features, it's the playability that puts this game in the stratosphere. Don't expect to master it quickly, but do expect to have a great time trying! John Madden's Football is easily the most popular game we've ever had in the office, and deservedly so.

MUSIC, MAESTRO

John Madden's Football features some amazing music and sampled sound effects. Who's responsible for this aural feast? None other than Rob Hubbard, a British computer musician who made a big name for himself in the mid 80's composing a vast array of incredible soundtracks for C64 games. He disappeared a few years ago to work for Electronic Arts in the states, and kept a low profile. But now he's back on the scene with a vengeance - let's hope EA let him loose on more of their Megadrive games!

THE JOHN MADDEN ALL-STARS

As well as featuring 16 different AFL and NFL teams to choose from, there's also the John Madden All-Stars, a team of true superstars who can run, pass and catch better than any other team. Choose it when you're playing two-player and you'll have the advantage, unless the other player chooses this same team.

ON THE ROAD TO THE SUPERBOWL

▲ It's cold and snowy, and the offense decide to punt.

▲ It's the kick off!

▲ Blues catch the ball.

PASS, RUN OR WHAT?

When you take control of the quarterback, pressing C brings up three mini windows showing where the receivers are. Pressing either A, B or C passes the ball to the player in the respective window. However, if you decide to run, you're able to spin to shake off tackles, dip your head to crunch into and knock over players who try to tackle you, or take a dive to hurt yourself into the endzone or across the ten-yard marker!

▼ The teams huddle and decide the next play.

The playoff option is a long-term campaign where you try to get your team to the Superbowl. Sixteen teams line up at the start, and it's a simple game of elimination - win and you go through, lose and you're out. Since getting to the Superbowl is difficult in one sitting (requiring a full hour and a half's play on minimum time limit if you made it to the final), there's a password system that lets you carry on from where you left off.

▲ The teams are ready to play.

▲ 24! 38! Hurl!

▲ The quarterback dives for the endzone...

▲ ...and makes it! Touchdown!

▲ After kick off, the teams huddle again.

▲ The blues line up for a passing play!

▲ After the snap, the receivers are waiting for delivery.

▲ Disaster! A sack well behind the offensive line.

▼ The running back dives to make the first down.

▼ Other results are displayed..

▼ It's a sack as the defence crash through.

When you choose a team, you're not just picking a name. Each team has its own strengths and weaknesses, so make sure you look at the stat sheets in the instruction manual before you start so that you can pick a team that suits your playing style. Otherwise you'll be at a big disadvantage!

▲ The stats are displayed: Pittsburgh were outstanding!

▲ The quarterback is running, and the receivers are wide open.

COMMENT

JULIAN

This is the most stunning sports simulation I've ever spent it perfectly recreates all the thrills and spills of American football. There are so many amazing touches, I just don't know where to start: the absolutely gob-smacking 3D graphics which have to be seen to be believed, the superlative music and sound effects, the incredible amount of play options, the way the players celebrate a touchdown, the completely brilliant two-player option, the way the players all gather round before a play, the highlights from other games that are played after a match... I could go on, but I'm sure you've got the message. John Madden's Football is the best Megadrive game yet - if you're a sports fan it's an essential addition to your cartridge library.

SKILL, BRILL 'N' ILL

Dear YOB,
I would like to say how absolutely brilliantly mean this console mag is! It has all the features that the readers want!

The number of screen shots is more than brill. I can say What I hate about the other computer magazines is that they only show a limited amount of screen shots and some in black and white, which is annoying.

This magazine is a truly (and I mean really truly) colourful magazine, page after page of full bright and attractive colours showing all the games in it.

One last comment, keep up the excellent work!

SEE HAIR

Yo YOB!
I think I must point out that I'm really impressed with the first issue of MEAN MACHINES. What I found particularly fascinating was the originality of Julian's hairstyle, and could someone please thank his mum for doing such a wonderful job of it. As well as this important factor I thought the whole magazine was very well set out, the cover and interior art was brilliant and the reviews told you everything you needed to know about the game (except how to complete it!). I also thought the tips section was a nice touch to the mag.

However I did find a couple of faults with the issue. One of which was the stupid idea of somebody's to place this information of the review over enlarged pictures of the sprites or on the top of photographs. I ended up with sentences like, "Death...the b... dest...out...". Please stop "...ing" around with the writing!

I can't wait until the next issue. I just hope there aren't any more pictures of Julian!

Barry Chenay, Wellingborough, Northants

YOS: Jezza's eupar haircut is a special knife and fork project funded by the Tibetans Cockatoo Foundation. They say it has great religious significance, so don't knock it. We're avoiding the text-over-pictures problems from now on, so please do not adjust your set.

MSD THE POET

Yo YOB!
I'm what's called a MSD (Master System Dude), and an ewestruck one at that. I was amazed at the superb quality of this new console mag - it has a neat end easy to use layout and a sensible rating system. Being so thrilled by MM I have written a poem about it:

What mag contains
Sega, Megadrive, and Nintendo
games?

To give you one little clue:
inside there's someone called
Matthew.

included are titles such as Skete
Or Dia,
And the great Revenge Of Shinobi.
There are also excellent clear pics,
And really useful tips.

The writers give the normal
previews
As well as the best ever reviews
On the middle pages are the best
charts
Which include your favourite carts.

Comps are agreed all over,
But it's a pity you don't win a Nova
If you still have not got it yet,
You live in another universe, I bet!
James Walker, Trentham, Stoke.
YOB: Are you sure MSO doesn't
stand for morose/meanless
drives, since you have an
amazing ability to put the
English language through a
minor and thoroughly destroy
it - I bet Kaets and Tannyson are
spinning in their graves. While I
thank you for your kind
thoughts, I wouldn't embark on
a career as a poet if I was you - I
think you'd be lynched by a
gang of marauding bearded,
round-glasses wearing,
shaggy-jumpered, sandal-shod
Intellectuals and beaten to death
with their rhyming dictionaries.
By the way, Shinobi is
pronounced Shin-o-bee, not
Shin-o-bee. And do you really
want to win a Nova? They're
crap. Gah!

WHAT'S A NEO GEO

Dear YOB!
Please put my mind at rest and tell
me what the heck a Neo-Geo is,
what it looks like, and plays like. It
has been advertised in a lot of
magazines now, but I have yet to
see any reviews about it. What
stunned me was its price and its
games. I mean £200 a game!
What is this thing trying to do, take
over the world?

So tell me, are we going to see
more of this machine, although I
can't see many of us buying it at
its price, or is it just highly
over-rated and priced? What does

Jaz think and would you ever buy
one? Oh yesh - congrats on a
mega mag!
Merle Riseborough, Fakenham,
Norfolk
YOB: Oh dear, you're certainly
not a hip, cool, with-it console
dude are you? The Neo Geo is
an arcade quality console which
can produce amazing graphics
and sounds at a price only
madmen can afford. Jaz had one
for a couple of weeks, and says
the games are good, but are
nowhere near deserving of their
wallet-crippling price tags.

WHO REVIEWS THE GAMES

Dear YOB!
Can you tell me who reviews the
games and gives them the
percentage as they should be out
of a job because they speak a load
of rubbish. Anyone in their right
mind can see Golden Axe on the
Megadrive is miles better than
Wonderboy III on the Sega. But
this brain dead person gave
Golden Axe 91% and Wonderboy
III a ridiculous 95%. Apart from
that MEAN MACHINES magazine
is very good.
Mark Chadwick, Blackpool
YOB: Coo, we've got a right
regular Richard Cranham here,
haven't we. Jaz and Matt review
the games, of course, who do
you think do them - Sooty and
Sweep? Don't you think it'd be
rather stupid if we kept saying
"this Sega/Nintendo game is
good, but the graphics and
sound aren't much cop
compared to the Megadrive".
Sega games are judged by other
Sega games, and Megadrive
games are judged by other
Megadrive games. If we
compared games with games on
other systems, Nintendo and
Sega games would always get
relatively low marks. It's as
simple as that. I hope your
intellect can process that piece
of information.

A SPRITELY QUESTION

Dear YOB!
In my quest for a console, I have
come across various computer
magazines such as this one, and
all have been very helpful in my

final decision.

I thought I knew all the
technicalities I needed to know
until I came across the word
SPRITES. Could you do me a big
favour and explain what these are.
Samantha Freckleton, Luton, Beds
YOB: A sprite is a moving
graphic object on-screen, such
as a space ship, man, baddie or
whatever. Basically, if it moves,
it's a sprite!

BOO! HOO! HOO!

Dear YOB,
Why don't you review any PC
Engine games in your comic to
make it even more rad than it is
and I would like to tell you that
Dick Tracy is ALREADY out in
America on the Nintendo control
deck. I haven't got a console but
I've got an Amstrad PC which isn't
really a games computer so I'm
hoping to get a Nintendo for Xmas.
But of course I could get a console
earlier couldn't I?
Nicholas Lewis, Bedford, Beds
YOB: The PC Engine isn't
officially available over here, so
we don't cover it. CoVg are the
guys that cover the PC Engine,
so buy that instead!

DODGY DIGIT DROP-OFF

Hi there!
I was reading the Who's Who
article on page 8 about you guys
down there at Console Central and
I'm telling you, with being twice
crowned UK Champ, I'm surprised
Jaz's fingers aren't dropping off
with all that competition. I guess
he's retired to a more relaxing
position behind his trusty
typewriter. But then again, all
those keys, it's as bad as a
computer. I guess you can't win.
I'm a Sega man myself, besides
who am I to talk, I used to own a
Spectrum until I had a few loading
problems so I put a hammer to it!
Anyway, I'm cutting loose, keep
up the good work lads.
Shant Bennett, Walsall
YOB: Naah! Jazza's fingers are
so stiff 'n' hard they're classed
as lethal weapons. Ideal for
predating Gary Harrod when
work needs to be done. Just out
of interest, what are you telling

loose? Whatever it is, make sure
you're careful, that's all.

NO PC ENGINE!

Dear YOB!
I've been buying CoVg for the last
three years, but never felt the need
to write to you before. But having
recently purchased MEAN
MACHINES Monthly, I just had to
express my anger in one way or
another.

I mainly buy CoVg for the
excellent console reviews,
particularly on the PC Engine. So
when I read of your new console
mag, I naturally thought it would
review a fair amount of PC Engine
games. Especially when an advert
for it in CoVg showed a full page
spread of Gunhed tips.

So having rushed out to buy it,
and then discovered there aren't
going to be any PC Engine
reviews, I feel this deceiving advert
is inexcusable.

Apart from this, the magazine is
brilliant and the review system
even better.
Peter Mills, Kirby, Merseyside
YOB: We-e-e. When we first did
the dummy, it seemed very
likely that NEC were going to
launch the PC Engine in
September, so we included it in
MEAN MACHINES. However,
they've put back the launch until
next year, so it had to be
dropped. A shame, really, but
than life's a beach.

SPEW THICK ON HAMSTER JAM

Yo YOB!
I'm a thirteen year-old Dutch
Commodore 64 owner and I want
to buy a Megadrive, but my
parents don't want that! Could you
please talk to them and print this
letter 'cos I have tried everything
but they won't listen to me.

And why does everyone hate
your name? I wish I was called
YOB!

Marijn Jansen, Tiel, Holland
YOB: Oi, Mr Jansen. Buy Marijn
a Megadrive or I'll fly over to
Holland and attack you in the
nearest dyke. Which won't be
very nice for all concerned.

Q+A

- on the Megadrive?
2. When will the CD-ROM be out on the Megadrive?
3. Is Hard Drivin' out on the Megadrive yet?
4. Is there any chance of Violence Fight on the Megadrive?

I think your MEAN MACHINES mag is totally ace and so is C+VG Jason Smith, East Lancashire JAZ: There are no plans to release Shadow Warriors. YOB said that the CD-ROM won't be available until next Christmas - can't you read? Hard Drivin' isn't out on the Megadrive yet - it'll appear early next year. Yee, Violence Fight will be released on the Megadrive, but not until next September.

SEGA VS NINTENDO

Dear Jaz,
I'm 14 years old and haven't got a console at the moment, but hope to get one very shortly. But I'm wed between the Sega 8-bit and the Nintendo and I don't know which is the best.

So I'm hoping that you can give some good and bad points on each console and which has the best and cheapest games.

I would also like to know which pack would be the best to buy for each, eg Sega Master System and Master Plus. Hope you can help. Del Boy, Norfolk
JAZ: As I've said about a million times before, it doesn't matter which machine is best, it's whether or not that machine has the type of games you want to play that's most important. Look through the mag and see which games you like best, and then see what system they're on. Then buy that system. Easy, eh?

NINTENDO QUICKIE

Dear Jaz,
I have a few questions to ask you:
1. When will Robocop II, New Zealand Story, The Last Ninja, and Gauntlet II be released on the Nintendo?

David Beristo, Bangor
JAZ: Robocop II is out next Christmas, New Zealand Story has no release date, and both Gauntlet II and Last Ninja are

due out in the middle of next year

WILL THE BIRDS FLY?

- Jaz,
In YOB's Gossip, I read they're converting Falcon/F-15 Strike Eagle II to the Megadrive and I have a few questions.
1. How will they work without a keyboard?
2. Do you think they will be as good as the Amiga versions?
3. Will they have the mission disks?
4. Which do you think will be the better of the two?

Tim Walker, Cambridge
JAZ: Oh dear, what a list you're in. Why do they need a keyboard? There are ample buttons on the joystick to run both games perfectly - especially if the second joystick is used. Both should be as good as the Amiga version, and mission disks are doubtful unless a disk drive is released for the machine before the programme appears. And finally, how the hell should I know which one will be best? I'm not a clairvoyant.

SUPER FAMICOM COMPATIBILITY

To Jaz,
I have a Nintendo and I am thinking of buying a Nintendo Super Famicom. Will the games from my old Nintendo work for the new one?

Richard, Longfield, Kent
JAZ: The Japanese version of the Super Famicom will only be compatible with Japanese Nintendo games. So if you've got British Nintendo games, they won't work. You'll have to wait for a British version of the Super Famicom to appear if you want to run your games.

WHAT'CHA RECKON

Dear Jazze,
I would like to have your ratings on these games for the Megadrive: Final Blow and DJ Boy. Thanks.

It's questions and answers time again, with another mountain of queries for me to answer. How do you think them all up? Who knows - but keep on asking, and I'll keep on answering. Except for dumb questions like "tell me every game that's coming out on the Megadrive" or "list every game on the Master System and how good you think they are". As I said last month, make your questions reasonable please, or they won't be printed!

If you've got a burning question you want the answer to, write to: JAZZA'S Q+A, MEAN MACHINES, PRIORY COURT, 30-32 FARRINGTON LANE, LONDON, EC1R 3AU. If your questions are intelligent, I'll answer them...

GAMEBOY QUERY

Okay Jaz
I'd like you to answer my questions

- on the Gameboy:
1. Is Tetris any good?
2. What is the best game you can get?
3. What shops sell the Gameboy?
4. Is the sound four-channel stereo?
5. If so, is it anything like the Amiga?

6. Is it an overall good buy?
Conor McKey, County Tyrone, N Ireland
JAZ: Blinking flipp! You've got a veritable goodie-bag of Gameboy questions. Right, here goes. Tetris is superb - I wouldn't leave home without it. Which game is best? Keep on checking the reviews and buy the ones which you think you'll like best. Dixons, Toys 'R' Us and Boots are amongst many high street stores which sell the Gameboy. Just window shop next Saturday - you'll spot it for sure. Yee, the sound is four-channel stereo, but it's nowhere near as good as the Amiga. Yee, it's a fine buy!

MEGADRIVE QUESTIONS

Den Julian,
I'm writing to ask these questions.
1. Is Shadow Warriors coming out

Daniel Mann, *Menstrine*

JAZ: Final Blow is pretty boring, and only rates about 70% - there are only four opponents, and you fight them twice before you finish the game. DJ Boy is a laugh, but it's very easy to finish on the normal level. It'd get about 75% if we saw rawlaid it in MEAN MACHINES.

TOM MIX

Dear Jaz,

The first issue of MEAN MACHINES was excellent. I have some questions to ask you, so please put me out of my misery and answer them.

1. Do you know what happens at the end of Crude Busters, and if so, what happens?
 2. What's your favourite arcade game?
 3. I am stuck between buying a Sega Megadrive or a PC Engine. Overall which is best?
- Stuart Bell, North PS
- Would you please tell me whether that a Megadrive isn't a waste of money.

JAZ: Oi, Mr Bell. Megadrives are not a waste of money. Smoking, drinking and gambling are. At the end of Crude Busters you fight an alien, which changee shape and climbs around the walls. Beat him and you reacas the President, who gives you a really crappy reward. My favourite coin-op? I Robot and virtually all Williams coin-ops are tops in my book. As to the Megadrive vs PC Engine question - see the answer to the SEGA VS NINTENDO question alawhara on this page. The same answer applies here.

"INTERESTING" QUESTIONS

Dear Jazza,

I think this new meg of yours is the best. It gives far better reviews on console games than any other mag available.

1. Will Special Criminal Investigations come out on the Megadrive?
2. Will Crude Busters be out on the Megadrive?
3. Will R-Type II come out on the Megadrive?
4. Is Alex Kidd: Enchanted Castle worth getting for the Megadrive?

5. Will we be able to subscribe to the magazine?

Carl Jorgenson, Waterlooville, Herts

JAZ: What a load of boring questions! SCI is out around August next year. R-Type will be next Christmas and at the moment there are no plans to release Crude Busters. Alex Kidd is alright, but there are loads of better Megadrive games; end yes, you can subscribe to the magazine - check out the ad in this issue.

WOT ABOUT THE GAME GEAR?

Dear Jaz,

I am trying to decide which console to buy between the Sega Megadrive and the Sega Game Gear. I would be grateful if you could help me.

1. How much will the Game Gear cost?
2. How much will the games cost?
3. Is it a colour screen?
4. Finally I would like to know if the graphics are on a par with the Megadrive.

Darren Lord, Newmarket, Suffolk

JAZ: When the Game Gear is officially released (hopefully next Easter) it'll cost roughly between £125 and £150 - on import it'll set you back a bank-busting £200! The games should cost around £20 or so, and yes, it does have a colour screen. The graphics are nowhere near as good as a Megadrive - after all, the machine is basically a portable Sega Master System.

WHERE'S POWER DRIFT

Dear Jazza,

I often read through the Complete Guide To Consoles, and recently when I was looking at volume one I saw a release date schedule. Some time later there is still no appearance of my favourite arcade game Power Drift for the Megadrive. Was this just speculation, or will the game be

released for the Megadrive? If so, when is it due to appear on import?

Also, I have seen various letters in computer mags about

Megadrive compatibility. I wish to know if the Japanese Megadrive will run UK cartridges.

Jonathan Low, Kirkcaldy, Scotland.

JAZ: According to Japanese sources, Power Drift won't be around until Easter. You can run UK games on Japanese machines, but the plastic cartridge lock has to be removed beforehand.

MEGADRIVE VS GX4000

Dear Jazza,

I have been saving my money for ages to buy myself a new console. At the moment I own a Sega Master System and 18 games and what I would like to know is, should I buy a Megadrive with the Power Box Converter or should I wait and buy the Amstrad GX 4000?

Freddie, Portedown, N Ireland

JAZ: See the answer to the SEGA VS NINTENDO letter. But

If I was given a personal choice, and as long as you promise not to tell anybody, I'll admit that the Megadrive would be the one for me...

CASINO GAMES

Robert Brooks of Middlesex has a neat tip for all you gamblers out there. For an unlimited supply of cash, enter this code:
MR SEGA 8314853112.

POWER STRIKE

Once again Robert Brooks has a rather useful tip, this time for players of this excellent up-the-screen blaster. To start the game with ten lives, push the joystick down, right, down, down, left, right, up, right and button once twice on the title screen.

SPACE HARRIER

This is a crusty old cheat from Darrell Baumber of Yoxall, Staffs, but some of you might have missed it. Push up, down, left, and right on the joystick to get a music

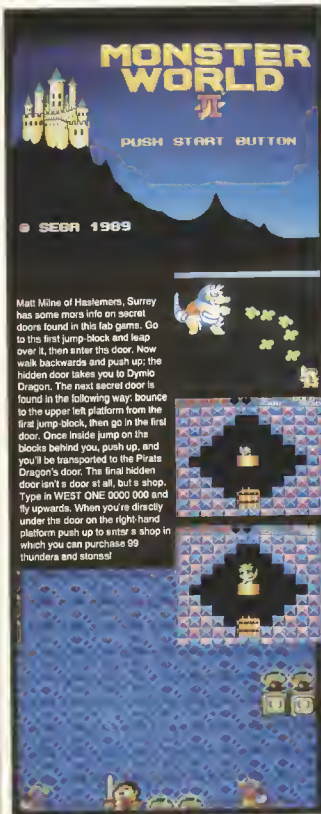

options screen. Then a graphics menu should appear, where you can choose between man or plane. This cheat works from the title screen with the man and elephant.

GOLDEN AXE

To get an extra credit, wait until the game over screen then press the joystick diagonally up and left. Thanks to Usman Chaudhry of Southgate, London for that one.

DEAD ANGLE

Paul Plasenda of Wapping, London has a good one for players of this Operation Wolf style game. Plug in two joypads and turn on the machine. When the title screen appears, move both pads left and right until you hear a noise effect, then press any button on joystick one. Now you should be on a later stage!

Merry Christmas gamesplayers! To celebrate the festive season, we've got together the very finest hints and tips from top console players all over the country! If you're a bit skillful with a joystick, why not share your best tips with MEAN MACHINES readers around the world by sending them into the magazine! We'll definitely print your stuff if it's good, and if what you send are the best tips of the month you could even win yourself the monthly prize of £150.00 worth of console software for your machine! So what are you waiting for - get scribbling and send your stuff off to: MEAN MACHINES TIPS, MEAN MACHINES, PRIORY COURT, 30-32 FARRINGDON LANE, LONDON, EC1R 3AU.

THUNDERFORCE III

Brett Lawson of Stannington, Sheffield has a handy little tipette for this shoot 'em up. At the start of level two immediately fly down and forward into the rocks in order to get a CLAW power-up.

Just when you thought
you had seen it all

LAST BATTLE

What a horrible little game this is. Still, if you've got it and want to get a little bit more out of it, after completing the first chapter, lose all your energy and die. Then press A, B, and C simultaneously and hold them down, pressing start several times. You should now be able to choose your starting point!

GAMEBOY

MASTER KARATEKA

Just in case you've got hold of an imported copy of the game with Japanese instructions, here are the moves in English courtesy of Daniel Morris of Welling, Kent

UP: Go into running mode or up a block if in combat
DOWN: Go into fighting mode, or down a block
RIGHT: Advance/ move right.
LEFT: Advance left
B: Mid-kick
A: Mid-punch.
B + UP: High kick.
B + DOWN: Low kick.
A + UP: High punch.
A + DOWN: Low punch.

CASTLEVANIA

To get a 1-UP, ignore the first torch - in other words, don't whip it. If you then get all the torches other 11, one of them will be an extra life rather than a coin. Wow! What a whopper tip. Cheers very much to Alexander Boden, of Cobham, Surrey

NINTENDO

LIFE FORCE

If playing with two players, the person who dies first can steal a life by pressing A and B at the same time. A cheat that will result in a few broken noses, we think! Cheers to B McGroarty of Londonderry for that.

CASTLEVANIA

Once through the Hall of Heads, grab the stopwatch. When you get to Medusa use it and keep hitting the nasty until she's dead. When fighting the trolls, watch out for when they wriggle their behinds, then it's time to dive underneath a platform. And that's how Mike Eales of Hampshire does it.

TIPS

GHOULS 'N GHOSTS

Robert Crosby from Halifax, somewhere up North has found a heap of epic cheats for this superlative Megadrive game. On the title screen press the A button four times then move the joystick UP, DOWN, LEFT, and RIGHT. A tune should activate, allowing you to do one of the following:

B and START: Makes you invincible.

UP, A and START: Starts you halfway through level 2.

RIGHT, A and START: Takes you to level 5

RIGHT/DOWN, A and START: Takes you straight to Loki, the final guardian.

DOWN, A and START: Beginning of level 3.

LEFT, A and START: Halfway through level 4.

The invincibility cheat can be combined with others, eg **DOWN/RIGHT, A, B, and START** will take you to Loki and you'll be invincible too!

Also, if you hold down B during play all the sprites will go into slow motion. Alternatively, by pressing B on and off, you'll get frame-by-frame animation.

SUPER MONACO GP

This isn't exactly a cheat, but it causes much merriment for those who like to have a good laugh every now and then. If you want to see yourself holding up the trophy instead of the winner's cup, press and hold down the A and B buttons after you've crossed the finish line in wet conditions. Thanks to prankster Tim Williams of Farnham, Surrey for that.

SUPER HANG-ON

You should have found this by now, but just in case you haven't, Martyn Race of Winklebury in Hampshire has sent it in. Press A, B, and C at the same time on the title screen in order to change the time limit and the difficulty

REVENGE OF SHINOBI

A very useful tip we discovered while playing is it you go to the options screen, select OO shunkens and then press the START button as fast as you can. After a second or so, the two zeros join together to form an infinity sign, meaning you've got infinite shunkens! Now on with the rest of the tips, which were kindly supplied by ace Megadrive gamers, Tim Bullock and Simon Walklate who live in Stoke, and Alex Bentley, London SW6.

LEVEL ONE: SAMURAI

Somersault onto the platform on the far left hand side of the screen, select Ninjitsu of Karu and use it, then just keep somersaulting and shooting when he is slashing downwards until he explodes. Alternatively (and this is trickier), select Keru, then walk into him, constantly slashing. He'll walk backwards and eventually explode.

LEVEL TWO: DISCO NINJA

This guy somersaults all over the screen and throws one shuriken. Crouch, and when he lands, kick or stash him. Keep on doing this until he turns brown. Select Ninjitsu of Karu and use it. If he's still alive, use the crouching technique again - watch out because he throws four shunkens now - and throw shunkens whenever you can.

LEVEL THREE: THE MACHINE

Walk to the right of the screen and somersault through the second laser onto the back of the machine. Select Karu when the brain in a jar is visible and use it. Wait until the laser gets on top of you and then jump up and left to get up the step. Then wait until the laser gets on top of you again and then walk down. Keep doing this until the brain re-appears, then crouch and shoot it. Jump back onto the step and repeat the above procedure. It takes about 11 shots to destroy it, so be patient and keep at it.

LEVEL FOUR: THE ROBOT

It looks human, but throws cars and engines at you. To destroy it make sure that you have at least three men because you need to use Mijin Ninjitsu. Select this magic twice, then select Ninjitsu Karu and use it. If the robot is still alive (very doubtful), somersault and shoot it - it should only take a couple of shots to make it explode.

LEVEL FIVE: THE MISSILE

The missile has three weak spots which all must be destroyed. These are situated in the middle, to the left and to the right of the truck and can either be shot or kicked. There is a blue dot from a crack in the missile which flows from the right of the screen to the left - watch out for it and jump over it. It's best to destroy the middle weak spot first because it stops the flame thrower from firing at you.

LEVEL SIX: SUPERHERO

The superhero starts off as Spiderman, then after being hit a few times turns into Batman. First select Ninjitsu of Keru and use it. He should then turn into Batman and fly slowly around the screen. Jump and shoot at him and he'll gradually change colour and after a number of shots will explode.

LEVEL SEVEN: GODZILLA

Don't bother trying to shoot him. Select Mijin magic and use it three times. If he's not dead after the third time, select Ninjitsu Keru and use it.

LEVEL EIGHT: THE MASTER

Magic has no effect on this guy, so use your shield. In the background you'll notice your girlfriend being crushed to death by a wall. The only way to stop the wall is to keep shooting into the hole either to the left or right of the screen every few seconds.

The best way to destroy the Master is easy. Crouch down and walk towards him. Keep a little space between you and the Master while he's swinging his wig so it doesn't hit you. Every few seconds he tries to whip you - stay in the crouch position and shoot him once, then jump away immediately as he throws his wig at you. If you keep on shooting through the holes and use the crouch method, you should be able to defeat him fairly easily. Now sit back and watch the end sequence...

TIPS

HERO TURTLE HASSLE

Dear Jaz,
I'm stuck on level three of the turtles game, and just don't know what to do. I hope you can help me.

Andrew Wade, Newport, Isle of Wight

JAZ: Flip me, what's the question to ask. I'd need pages and pages to give you precise details, but

hopefully the tips below should get you started. It's a tough level, with eleven buildings and tunnels to explore. One of the buildings on the top right of the map has a magic scroll which gives you amazing firepower. Splinter is in the sewers - the entrance is near to the stone bridge across the river. But don't go down there until you've got at least 60 acrofla.

HIGH TECH TIP

Dear Jaz,
Please could you tell me where the eighth piece of paper is in Alex Kidd in High Tech World?

Roberto Simone, Cardiff

JAZ: Right, it's in the fourth floor clock, and you have to use the ladder to get to it.

TYSON KO

Dear Jaz,
I'm stuck on Mike Tyson's Punch Out!! and just can't beat him. Please could you tell me how to get past him.

Ben Olsen, Wrexham, Chwyd JAZ: Okay, at the start of the round Tyson advances and punches like crazy. Dodge left

and then hit him twice in the face. When he pretends to punch, do the same thing. Just keep on doing this and you should be able to KO him three times in the fourth round. Practice by using the code 007 373 5963, which takes you straight to him.

MIRACLE TIP

Dear Jaz,
I'm stuck on Alex Kidd in Miracle World - I just can't get past Cragg Lake. Please can you help me. Ian Oakley, South Benfleet, Essex JAZ: Do you know that you're right at the end of the game? The way to get past this final barrier is to run over the boxes

in the right sequence. Which is...

Run over the Sun Box
Run over the Two Waves Box
Run over the Moon Box
Run over the Star Box
Run over the Sun Box
Run over the Two Waves Box
Run over the Fish Box

SUPER MARIO BROS CHEAT?

Dear Jaz,
I'd like to know how to get to the end of Super Mario Bros and defeat the dragon. At the moment I can only get to 8-2, but then get killed.

Jamie Bastock, Horley, Surrey
JAZ: There's no direct route right to the end of Super Mario Bros. I'm afraid, it's just pure skill that'll get you through. The only advice I can offer is to press A and start

simultaneously when you die, and you'll start again on the beginning of level eight. Otherwise, just keep practicing!

KUNG-FU KO

Dear Jaz,
I've got a Sega Master System and am stuck on Kung-Fu Kid. I just can't beat up the demon at the end of round five - he seems invincible. Can you tell me how to give him a darn good kicking?

Ryan Krum
JAZ: Sorry matey, but I never played this one very much. If one of you readers knows how to do this, write in to the MEAN MACHINES Helpline with the answer, and I'll print your name and your letter.

GOLDEN AXE HACK?

Dear Jaz,
I've got the game Golden Axe on the Sega Master System, but I can't beat the boss because I never have enough lives left when I reach the end of the game. I've got the cheat which gives extra continues, but even that doesn't help me much. Can you give me a cheat that can get me through to the end of the game.
Ben Butler, Bockenham, Kent
JAZ: Are you sure you don't want me to finish the game for you? As far as I know, there's no cheat to give you unlimited lives, or get you to the end of the game - I'm afraid you'll just have to keep on battling...

WHERE'S DRAGON TWELVE?

Dear Jaz,
I'm stuck on Wonderboy in Monsier Land. When I reach level twelve, I get stuck in the maze and simply can't find the dragon. Please help me.

M Len, Fernham, Surrey
JAZ: Right, listen very carefully - I'll say this only once. At the start of the level, go right and drop down the first well. A fork in the wall appears, so go right. When you land, go left and watch the fireballs. Go down the first well you come to. Take the first exit on the right, which

brings you to another well, which you should enter. Exit first right. You're now in a room with blue goblins. Follow the hallway to the moving bricks. Jump up onto the moving bricks, which take you up five levels. Do not leave any exile when you go up the stairs. When you get to the top, go left. The screen keeps scrolling to the left. Continue until you come to an elevator. Take it to the top where you find a blue snake and go left. At the end there's a green shooting pot on top of a well. Proceed down the well and take the exit. There's another well to the right. Drop down and go to the bottom. Go off the screen to the right. The next screen has crepe (oo-er) which

contain hearts. Keep going right and drop down the well at the end. Go all the way to the bottom and then go left. At the far left there's a red knight and red snake. The dragon's lair is on the next screen - just knock on the red door and you're there. Now kill the dragon by aiming at his head - anywhere else has no effect.

MEAN MACHINES MEGAPLAYERS

Here's where you ace gameplayers can offer your services and become an honorary MEAN MACHINES Megaplayer. Other readers can write to you and ask for information on games that you know inside out. REVIEW

WORLD CUP
ITALIA
'90

If you enjoyed the World Cup over the summer, you'll be pleased to hear that you can relive all the cheers and tears of footballing's premier event thanks to this latest Sega cartridge.

World Cup Italia 90 can be played by one or two competitors, and is divided into three sections. The penalty shoot-out pits your wits against the foe in both roles - you play attacker and keeper alternately. The Test Match option has nothing to do with cricket, but is simply a one-on-one contest between the chosen teams. The World Cup is the main event, with all six groups represented.

Each team has individual strengths and weaknesses, but some are stronger than others (the reverse holds true as well - don't choose the United Arab Emirates unless you're a glutton for punishment!). However the teams are represented on the pitch by only eight players each, this is probably a good thing, as the pitch is very small indeed. An arrow shows which player is 'on' the ball, and running, passing and shooting are achieved through judicious use of the buttons and control pad.

So whether you want to be England, Argentina, or China, the choice - and the responsibility - is yours. Just don't cry if you're booked in the semi final!

THE DREAM TEAM

While choosing a team, it's possible to check out their stats. This helps to make the decision, choosing a team that compliments your playing style. The four statistics that are shown are: Offence, Defence, Speed, and Kick. These are rated out of five, and Brazil, Argentina, Italy, and the Soviet Union are among the best teams to choose.

▲ The Argies go one down - oh no!

▼ Time to state the obvious.

▲ Italy move into a striking position.

PENALTY!

There's a penalty shoot-out option which gives you the chance to take on the keeper in a one-on-one showdown. It's the best of live kicks - so make sure that each shot counts!

MATT

Football games are traditionally a hit-or-miss affair, and I'm afraid this is definitely a miss. I suppose it could be said that I've been spoiled by World Cup Soccer, but this game is awful by anyone's standards. The graphics are all right, but why only eight players per team - and why such a minuscule pitch? The control is appalling and awkward, with no discernibly easy way of making the nearest player chase the ball; at least not until the opposition has got there first. When possession is gained, however, it's simply a question of running towards the goal. Your opponent stands next to no chance of halting your progress. A football game that does not reward skill easily is no football game at all - and sadly, that's the case here.

▲ Where are the rest of the players?

COMMENT

JULIAN

World Cup Italia '90 looks good when you load it, since it features some excellent presentation screens.

However, when you play the game itself, disappointment is the order of the day. The graphics are dreadful and the pitch is so tiny, you've got no room to manoeuvre. Control is very poor - you can plough through the opposition, shoot diagonally and elick it into the net easily! And that's not all. The graphics are all out of scale (the men are nearly as big as the goal!), the ball movement is utterly unrealistic and the sound is dreadful. In fact the only thing that's good is the psnely shoot out! If you haven't got a football game, get the vastly superior (and cheaper) World Cup Soccer. Otherwise wait for something better.

▼ Control is really not as easy as they say!

ROBOCOP

RoboCop is set in the future, and the city of Detroit is caught in the grip of a crime wave the likes of which have never been seen before. The police force is now run privately by Omni Consumer Products, a giant multinational corporation. One officer, Alex Murphy, critically injured in the line of duty, is encased in a suit of titanium body armour, and let back on the streets as the ultimate in law enforcement - RoboCop.

Controlling the laminated lawman, your task is to clean up Old Detroit by wiping out hordes of mindless thugs, and eliminate both Clarence Boddicker (drug dealer, and the leader of the gang of crooks responsible for Murphy's condition), and Dick Jones, the corrupt Senior President of Omni Consumer Products (the corporation who rebuilt Murphy's shattered remains).

RoboCop is essentially a multi-level horizontally scrolling platform affair, with additional weapons and energy refills - and loads of bad guys!

Every so often, you need to get your targeting system recalibrated, so it's off to the firing range, to test your skills on some poor, defenceless cardboard cutouts. Once this is done, it's back on the beat, and time for more thug-mashing! It's you against them, so get to it - Old Detroit's depending on you!

DIRECTIVE 4 (CLASSIFIED)

RoboCop, both in celluloid and video form, has been a huge success ever since its initial release in the States back in the summer of 1987. Essentially a cop film with metal bits, the black humour, and over the top violence combined with a strong script made it one of the most popular films of recent years. Of course, once the merchandising coffins recognised the movie's true value, a whole skippload of spin-offs emerged, including toys, models, books, a cartoon series (a video of which - Detroit Crimewave - is now available), and of course, a computer game, which went to the top of the charts and stayed at the number one spot for over six months, and is still in the charts today, some two years after its release!

▲ The door's guarded, and not even a press pass will do!

▲ Three of these mays run around and shoot at RoboCop at the end of level three.

▲ Up in the lift - is he wearing deodorant?

▲ This fat tramp bothers RoboCop in his search for Gary Herold.

▲ Level one, and the hostage must live - or Robo will die!

COMMENT

RoboCop is one of my favourite films, so I can only express big disappointment at this half-hearted Nintendo game. Not only are the graphics very flickery and dull - RoboCop's animation is truly awful and the backgrounds are very drab indeed - but the sound is also dire, the controls are sluggish and the gameplay is very repetitive.

There's lots of trudging around shooting at badly drawn baddies, and very little else. Had there been more variety, RoboCop might have been fun, but as it stands it quickly gets boring. Considering the sit-action movie, I'm sure that a lot more could have been made of this.

REVIEW

ROBOCOP

▼ Time's running out for the battery-operated policeman.

▲ RoboCop's biggest tear is not ED209, but rust.

▲ The Stars and Stripes provide a backdrop to this lethal encounter.

CHECK YOUR SIGHTS

During the game, RoboCop attends a shooting gallery to recalibrate his sights. The shooting action is displayed in 3D, and the player controls a set of crosshairs with which RoboCop's gun is aimed at the pop-up targets. There's a set number of targets to hit - and if you're a very, very, very good shooter, you should be able to get every one!

COMMENT

MATT

Oh dear, oh dear, what a disappointment. With the success of the movie and the original game, you'd think a console version could be just as good, if not better. Wrong! The graphics are dull and drab, and the sprites jerk and flicker about the screen like ghostly puppets. RoboCop himself slides about like a metallic Michael Jackson, and would more than likely make any crook laugh to death rather than quiver in his boots. The main title theme is enough to have you reaching for the volume in seconds, and the minimal pops and phutes do nothing to enhance the atmosphere any. Leave this one on the shelf.

ROBO

▲ RoboCop's an electrifying hero.

Life is never easy for a cyborg cop having to carry out the fight against crime all by his lonesome. Four months have passed since RoboCop's epic confrontation with Clarence Boddicker and his corrupt OCP official pal, Dick Jones. Old Detroit is being systematically destroyed by a combination of a colossal crime wave and the fact that the rest of the police force are on strike! Add to that the emergence of a new drug baron, Cain, and his new super-designer, hyper-addictive drug, Nuke, and Old Detroit seems totally doomed.

Being the righteous robotic rozzar that he is, RoboCop decides to take on Cain and his empire of sin and dish out some Robo-style, autopistol justice to the punks of the city at the same time. But there's a problem. Robo's mind has been re-conditioned and not only has he got saving Old Detroit from impending doom on his agenda, but he also has to contend with the feelings, memories and emotions of Alex Murphy fighting to re-surface...

AUTO-9 ANARCHY!

What with all this heavy combat, RoboCop sometimes has to brush up on his shooting skills. In order to do so, Robo takes a trip to the police firing range and lets rip with his autopistol. As the timer counts down, RoboCop must shoot as many targets as possible making sure he doesn't accidentally blast away any innocent bystanders. It's a good way to get in the w

COMMENT

RoboCop 2 shows GX4000 owners just what their machine can do. The graphics are superb, with excellent presentation screens, great sprites and colourful backdrops. However, the game's a real stunner to actually play. On the platform levels, there's hidden traps aplenty that'll have you rapping your head against a brick wall with annoyance. Progression through the game doesn't seem to rely on skills of any description. Although Robo is a graphical treat, the game itself is only really recommended to avid Robo-fans.

MATT

ROBOCOP 2

▲ Microchip fun in level two

ROBOCOP PLATFORM PATROL

Levels one, four and six all take place across four-way scrolling platform screens. Although RoboCop's orders vary from level to level, the actual gameplay is much the same. There's always one route through the level, and RoboCop must follow it, making sure he doesn't fall foul to some of the traps that Cain has left around for him. Spikes, deadly arcs of electricity and magnetic clamps are just some of the hazards that RoboCop meets on the way to the end of the level. Here, there's a huge target to destroy, be it Cain's Nuke producers, Cain's Nuke storage, or at the end of the game, Cain's brain - encased in the awesome Robocop 2 robot.

MICROCHIP MALARKY

On the way to making Cain's doom, RoboCop has to sort out his microchip board. Levels two and five are microchip levels, and consist of a circuit board with memory-inhibiting microchips. In level two, Murphy's memories by guiding the circuit board blowing the chips away. In level five, you can't double back on your trail, so a good deal of thought is needed to find a path that'll destroy all of the chips. In level six, RoboCop reconstructs the memories of his wife, so he can remember the memories of his wife.

▲ Great graphics and sound

COMMENT

Robocop 2 features some brilliant graphics, the backgrounds are excellent, and the intermission screens are superb. However, there are some very annoying

JULIAN annoying gameplay features in the platform sections which make it literally screaming with frustration. The collision detection is very dodgy - RoboCop often dies when it seems that he's well clear of a deadly obstacle, and he also has a habit of falling through holes in the floor when he turns around too close to them. Another annoying feature is that some harmful objects are so well blended into the background, you don't actually realise they're deadly until you've walked into them - eeeagh! It's a shame that these features are present, because they let down the excellent puzzle and shoot-out screens. Robocop 2 offers a considerable challenge which only hardened gamers will get the most out of.

After spending several years in retirement, Jetman has decided to face the universe again, this time with another get-rich-quick scheme with which to make his fortune. Jetman joins up with the Federation of Space Loonies and uses up his last remaining credits on a new fleet of space garbage collectors. With three worthy star vessels he can visit any planet he desires, collect all the rubbish and make a fat pile of cash out of it.

But when Jetman arrives at his first destination, among the rubbish he finds a piece of the once great Golden Warpship. With dollar-signs in his eyes, Jetman knows he could make a huge amount of money by selling the other pieces of this ship and the only problem is that there's only one problem: the other pieces of the planets in this solar system. To succeed, Jetman needs to make a long and danger-fraught journey.

Once on the planet, Jetman only has stacks of one hundred dollars and alien craft out to get out of his hands. He must collect all the pieces of the Golden Warpship and visit every planet in the solar system.

SOLE JETMAN

▲ Jetman arrives at a new planet.

THE STORY SO FAR...

Jetman started out life in the classic Spectrum game: Jetpac. This single screen frolic involved Jetman building a rocket and then fueling it up before making his escape to another screen. The follow-up, Loner Jetman, took our brain-dead pal with the jet pack into a horizontally scrolling playfield, where he blasted aliens Defender-style or climbed into his moon buggy and collected various weaponry to bolt onto his craft. After that, nothing was seen or heard from Jetman. Until now when Rare (the original programmers) dusted him down and gave him his own new game on the Nintendo.

▲ A spaceuit is Jetman's only protection!

REVIEW

JOINING THE JET-SET

The main gist of the gameplay involves Jetman getting into his spaceship and leaving base to collect the various garbages on the planet. His ship is controlled in a style familiar to anyone who has played Gravitar in the arcade. Gravity has an effect on the ship and thrusters must be engaged in order to stay aloft. Jetman has to collect all of the goodies from the planet and deposit them back in his base in order to progress. If his control of the ship isn't very good there's a good chance it'll be lost as it collides with the landscape, leaving Jetman with just his suit and jet pack for protection. However, new ships can be collected from base. Beware though, because ships are in short supply.

▼ Jetman's ship prepares for take-off

▲ Our hero sets out from base.

COMMENT

Wow! The old Spectrum Jetman classics were good, but for sheer playability, fun and excitement, Solar Jetman really atones on them! The prospect of a riveting-style gameplay with plenty of bolt-on weaponry makes for a totally fantastic game! The gravity alters for each world, and on some of the levels simply keeping control of your ships is the greatest challenge. With a depth of

MATT

gameplay ascend to none and amazing graphics and sound, Solar Jetman ranks as the greatest NES cartridge released this year!

REVIEW

Collect the Warpship segment here.

Jetman's ship collides with the ground!

INTERSTELLAR SHOPPING

As Jetman travels from planet to planet, he finds loads of extra goodies to bolt onto his craft. Amongst the planet's rubbish, Jetman finds equipment like a powerful shield generator - just the business for making those near-fatal collisions with the landscape slightly less risky. Also, at the end of the level when the Warpship segment has been collected, Jetman flies into an intergalactic shop to tool up with the latest goodies. Here, he finds the likes of more efficient engines, homing missiles, lime bombs and titanium bullet packs!

COMMENT

Jetpac and Jetman were amongst the first computer games I ever played, and it's great to see that great space loony, Jetman, back in action. The

JULIAN

action is very similar to the old coin-op Gravitar, and also like the brilliant computer game Thrust, but there's much more to it. The gameplay is very tough, and it takes quite a while to get used to the gravity - especially when you've got a great hunk of space garbage in tow - and the actual planets themselves are absolutely huge. It certainly helps to draw a map as you fly around so you don't get completely lost. The graphics are great, with lots of neat little effects, and the sound is similarly excellent. Put all those factors together and you've got a simply brilliant Nintendo title which is an essential part of your collection.

BLADES OF STEEL

This may sound like some kind of slash 'em up Swords 'n' Sorcery type game, but beneath the slightly ambiguous title lies a Nintendo version of the classic game of mindless, rink-bound violence - Ice Hockey.

The object is simple. At each end of the rink lies a goal and the objective is to hit the puck into the opposition's goal. Not surprisingly, the opposing team want to do exactly the same thing, so expect plenty of midfield malarkey before the serious goal-scoring begins. There are three rounds of ten minutes before the final whistle is called.

Before you even hit the ice, a number of game options have to be sorted out. You can enter your team into either a complete league or just a single exhibition match. Then it's off to choose which skill level you wish to play at (junior, college, or professional) and what team you actually wish to play as.

After that, it's down to your live on-screen hockey heroes and your joypad skills to save the day!

Ice rink hilarity as the team puck off

COMMENT

MATT

Blades of Steel is fun, fun, fun! Control of your on-screen team is simple and effective and complicated strings of hockey moves can be handled with ease! The action is fast and incredibly furious (with a beat 'em up element thrown in for good measure!) and the graphics, although a bit flickery at times are for the most part well-detailed with decent animation. Lastability is perhaps questionable, but with the terrific two-player mode there's no excuse not to puck off - now!

JOLLY HOCKEY STICKS!

Control of your players couldn't be easier! The joypad controls the player closest to the puck while the buttons are used to control the type of shot. Two types are on offer. A simple passing shot using button B sends the puck along to the nearest player, whilst button A attempts a shot at the opposing goal - wherever you are on the field!

Edmonton trounce Toronto by a massive fifteen points!

An open goal if ever there was one!

ES

LL

BEAT 'EM UP TACTICS

A fair amount of violence is involved in normal hockey - but in *Blades of Steel* gratuitous and unprovoked attack is necessary for victory! When you attempt to pinch the puck from the opposition the action cuts to a one-on-one beat 'em up section. Possession of the puck is secured by beating the seven shades out of your opponent!

▲ Can you "Spot the Puck"?

OFF-RINK OPTIONS

The actual gameplay in *Blades of Steel* is pretty limited, so it's a good thing that Konami has thrown in so many different options and settings to keep you occupied. As well as choosing which team you actually wish to play as, in the exhibition matches you can even choose your opposition. Eight top teams are featured in *Blades of Steel* namely New York, Chicago, Los Angeles, Montreal, Toronto, Edmonton, Vancouver and Minnesota. There's also a two-player mode included so you can face up to your best friend on the rink!

COMMENT

JULIAN

Ah! The swish of skates against ice. The thwack of stick against puck. The thump of fist against head! This certainly is ice hockey! As with all sports simulations, the action is best appreciated with two-players (just make sure the violence happens on the screen and not off it), but that's not to say *Blades of Steel* is a dull one-player game! With its multiple skill levels and different options, there's

plenty of variety to keep a lone player happy. Ice hockey doesn't sound like a really riveting subject matter for a console game, but this is a thoroughly enjoyable sports simulation which will keep you coming back to your Nintendo time and time again.

A The cars build as the car zooms round the track.

SEGA SEGA SEGA

If you've ever wanted the chance to drive a Formula 1 car in a Grand Prix, here's your chance in this stunning conversion of the super Sega racing coin-op.

Not only does Super Monaco GP include a completely faithful conversion of the arcade game, there's an option that lets you challenge other top drivers in a complete Grand Prix season - but more of that later.

If you choose the arcade mode, you're given the choice of three cars - auto, 3-speed and 7-speed, which increase in power but are more difficult to drive respectively.

Once that's done it's time to race a qualifying lap - the faster you do it, the better your grid position. The race itself is set over three laps, and you've simply got to stay ahead of the opposition to keep in the race. There's a position limit on-screen, and if you fall below that at any time, the race ends. If you're one of the first three across the finishing line, you get the chance to race again in wet conditions!

The World Circuit mode gives you the chance to race against other drivers over an entire Grand Prix season. All the world's most famous courses are included, and you've got to race around them all and out-perform other drivers to win the Grand Prix at the end of the season.

CHALLENGE A DRIVER

At any time during a season, you can choose to challenge another top driver. There's a huge list of different, almost familiar-sounding names to choose from, and they range from poor to professional. See who you can beat!

Techie specs ahoy!

COMMENT

MATT

making this so special, and the sweet really starts to pour as you view three cars approaching in your rear-view mirror - will you be able to keep them at bay? Easily the best racing game on any console, this game combines excitement and quality in a fun, cuddly package!

A Lose one more place and you're out of the running.

TRY A NEW TEAM

During a racing season, if you're winning lots of races and generally proving that you're a rather talented driver, you might be invited to join a top racing team. The benefits of this are top status amongst other drivers, plus you'll get a very powerful car with which to bum off the opposition.

THE CARS

There are three different types of car to choose from: Super Monaco GP. Each has a different transmission and power output.

AUTO: Has an automatic gearbox so you don't have to worry about changing gear. But it suffers from a lack of power compared with manually geared cars.

4-SPEED: Fairly easy to drive, with four gears to hassle you about while you zoom around. The car has medium power.

7-SPEED: The fastest racing car available, but has an enormous seven gears. This one's for pro drivers only.

▼ Thanks, chum!

REVIEW

SUPER LICENCE

The way to get the highest scores is to complete both the Super Monaco races. You're awarded points according to your starting position on the grid, the speed you travel and whether or not you're ahead of the opposition. A good player should be able to score over 4200 points! However, if you manage to score over 4500 points, the Sega Super Licence is displayed on-screen to acknowledge your outstanding gamesmanship! See if you can get it!

Fast cars and fast...

A car a right behind, so keep it up (oo-er).

The pretty opening sequence.

COMMENT

JULIAN

Racing games don't come any faster or slicker than this. The arcade mode is missing some of the big road race features like the buildings that appeared in the coin-op, but it doesn't really

matter since they're unnecessary to the actual game. The action is amazingly fast, and the 3D is both smooth and completely convincing. The World Circuit option adds a massive testing appeal, with a full season to race and other drivers to challenge - and even if you win the Grand Prix, you can return to the game to see if you can break all your lap records. Super Monaco GP is an utterly superb racing game which is a must for your collection - start saving now and you should be able to afford it when it's released at the end of January.

Hit too many other cars, and your racer starts to fall apart.

If playing computer games is Japan's national past-time, golf must be a close second. Hardly similar events, but their obsession knows no bounds. Arnold Palmer, the American pro player, has endorsed this simulation of the sport. But don't worry - you don't have to wear checked trousers and a Pringle sweater to play it.

The game centres around a tournament, but practice modes are available - and important if you want to hold your own in the main event. Choose your club, find the leg position that suits you best, check the wind strength and direction, and make your stroke. This is achieved by pressing the button once to start the backstroke, pressing again at the top of the swing, and a third time to connect with the ball, and determine the amount of chip or slice put on the ball.

The choice of club is paramount: choose a wood when only 80 yards from the green and the ball goes sailing into the woods - or off a cliff, as some of the courses are in very strange locations indeed!

Not a game that is easily mastered, Arnold Palmer's Golf requires a lot of practice and perseverance. But it certainly is pretty....

ARNOLD PALMER

GO

A BIT OF ROUGH

Sooner or later, and probably sooner, a shot will go astray and land in the rough. If this is just the surrounding area of the fairway, it's usually easy to chip the ball back on course. However if it lands in the trees, things can get tough. Oddly enough, the ball won't travel through solid wood, so it's necessary to rotate until the way is clear. Unfortunately, you can't cheat by quietly kicking your ball out of the woods!

COMMENT

MATT

Nintendo golf was always one of the highlights of the machine with its variable wind, clubs, and shot strength. Arnold Palmer's Golf is very much in the same tradition, but with greatly improved graphics (although the music's diabolical). It offers a stiff challenge, with testing courses; like any sporting game, though, it's much better with two players. I don't think this takes the genre that much further than the Nintendo game, but it's hugely enjoyable nonetheless. I recommend it to anyone interested in a golf game.

▼ Shuffle around until you're comfortable with your feet position.

IN THE CLUB

Choosing the right club for a stroke is vitally important. Try to learn when to use a putting wedge instead of an iron - and when to slice and chip instead of trying a straight shot. Another great option is the chance to have clubs made of different materials: black carbon, fibreglass, and super ceramic clubs are all available. It's up to you to discover the pros and cons of each type!

REVIEW

▲ Forw! Let's hope the ball doesn't land in those trees!

REVIEW

COMMENT

As golf games go, this is a very good example. Using big sprites, convincing graphics and a variety of player moves, this simulates the sport very well.

JULIAN It's pretty tough, especially when you're playing the tournament mode, but there are practice and two-player options to help you get to grips with the rather difficult course. I certainly enjoyed playing the game, and I think that any sports fan will find this both addictive and challenging - and your Dad will absolutely love it!

Great picture of Arnie himself on the title screen, and professional presentation throughout.

GRAPHICS 81%

The animation of the golfers is of a high quality, and the trees are very pretty too!

SOUND 72%

The theme is truly awful, and will drive you up the wall in no time. But the sound effects make up for it.

PLAYABILITY 82%

Once the basics are mastered, it simply becomes a matter of improving the score. It's much more fun with two players.

LASTABILITY 84%

Although it lacks excitement, this game has true staying power, as you'll keep coming back to it to improve your par.

OVERALL 83%

More fun than Bruce Forsyth, better looking than Tarby, and more strokes than Cecil Parkinson.

MEGADRIVE

Golden Axe remains top dog in the Megadrive chart for a third month, holding Shinobi and Forgotten Worlds back. The highest new entry is Populous at number three - a brilliant game that'll no doubt continue to sell by the bucket-load. Budokan is the other Electronic Arts game to make a strong showing, and Ghosts 'n' Goblins has finally appeared, propping up the very strong top five. Mystic Defender has somehow managed to climb - who's buying it? Thunderblade's on the way out, and Truxton is slipping fast.

NINTENDO

Hurrah! After two months of near non-movement, the Nintendo chart now has a new look. The Turtles zoom in to the number one slot with their impressive game - not surprising really, closely followed by another hot licence, Batman (which is reviewed elsewhere in this issue). Super Mario II drops, as does Zelda and Link - but the original Super Mario Bros has disappeared entirely! Bubble Bobble hits the charts this month - the rest are static or dropping down.

▲ Turtles - straight in at number one!

▲ Bubble Bobble - new entry at number eight!

SEGA

The Sega chart this month has an odd look this month. The top three stay exactly the same, and Double Dragon and Battle Outrun simply swap positions. Wonderboy III starts its inexorable rise to the top, while Enduro Racer, Galaxy Force and RC Grand Prix drop out of the chart. Ninja has no doubt climb further, but how long will California Games remain in the chart?

▲ World Cup - new in at seven.

▲ Double Dragon is rising slowly.

▲ California Games is still there.

There's something strange in the neighbourhood, and someone's called the Ghostbusters - the only ones who can save the city from an epidemic of apooks and ghoullies. Three of the four heroes are here: Raymond, Egon, and Peter, and each has his own strengths and weaknesses.

The object is to clear each level by catching rogue ghosts, which earns cash rewards with which to buy more equipment and weapons. Bombs, for instance are a must; as the characters only have a couple to start with, it's worth purchasing more so those nasties can be blown sky-high!

The Busters can crouch, jump, and fire to get through the hordes of spirits. Each level is ended with the obligatory major baddie, whose weak spot must be discovered and exploited.

Next up is a section where the hero attempts to grab a ghost with his positron-collider gun and trap it in a ghost trap. This is tricky, as the ghost doesn't stay still - and it has to be zapped very near the trap.

▲ Damn that monster's eyes! Ooops! Too late.

▲ We're in the money! We're in the money!

GHOSTBU

THE FILMS

1984 saw the release of Ghostbusters, the spook action movie starring Dan Aykroyd, Bill Murray, and Harold Ramis. The knockabout comedy, excellent effects, and catchy theme music made it an instant hit both here and in the States. The sequel was released last Christmas but was not nearly as popular, despite the presence of Sigourney Weaver once again.

▲ Here's New York, where there are lots of ghosts to bust.

▲ Hey guys, pass me the marshmallows!

STERS

COMMENT

The whole Ghostbusters phenomenon seems rather stale and boring these days, and I'm afraid the game suffers in the same fashion. It has its good points - I like the graphical

MATT style, and the intro screens are rather attractive. However, the gameplay is too limited to make this an essential Megadrive purchase: jumping around zapping cute epooks soon becomes a little boring. Still, there are some neat touches in there, such as the two shops that let you increase your options, and a pleasant reproduction of the theme music. Despite these factors, however, I can't honestly recommend this game.

▲ Aaagh no! It's the Mr Staypuft the marshmallow Man!

GHOSTLY GOODIES

When you kill some ghosts, they drop cash which can be picked up and spent in the shops that you can enter between levels. There are a variety of extra things to buy - here are the best of them.

3-WAY CANNON: The best low-priced weapon available and it only costs 7000 credits.

BOMB: Cheap and reasonably effective. Good against normal beddies, but rubbish against end-of-level guardians.

SUPER SHIELD: The ultimate weapon. But it costs a well-tastin' 35000 credits. Gives complete protection for 15 seconds.

FLAMER: A powerful gun that fires slow bolts of flame. Best suited for use on slow, inanimate foes.

CRAZY FURNITURE

▲ *Crawl underneath the tentacles or die!*

COMMENT

Unlike Matt, I enjoyed Ghostbusters a lot. It's pretty tough at first, as you need to work out each weedy baddie's weak spot to destroy it, but once you get used to the rather strange methods involved, ghost bustin' becomes an enjoyable and rewarding experience. There are plenty of humorous touches, like the magical moving furniture and some very weird end-of-level

JULIAN baddies - I love the ghoulie with the huge ghostie in his hat! With its excellent cartoon-style graphics and some great tunes, Ghostbusters is a neat platform/shoot 'em up which should appeal to Ghostbusters fans.

REVIEW

Bleeding bubbles may not sound like the most exciting of pastimes, but when you're a professional globe-trotting bubble blitzer, it's all you can think of. And that's what you've got to do in Pang, a conversion of the wacky Mitchell coin-op.

You (plus a friend, if playing in simultaneous two-player mode) have to travel the world, see the sights, and blast the heck out of loads of bubbles with your trusty harpoon gun before they bounce you into the middle of next week! It's not as easy as you might think - once a bubble is shot, it splits into two smaller bubbles, each of which splits into two even smaller ones!

The odds aren't all against you, as some bubbles release power-ups which give you a better chance to clear the screen. Once all the bubbles are disposed of, it's on to the next part of the world, with even more bubble!

COMMENT

MATT

Pang has to rate as one of the MEAN MACHINES crew's favourite coin-ops, and the GX4000 version is probably one of the best conversions you'll see on this machine for a long while. Bright colourful sprites, along with some absolutely gorgeous backdrops make the game a joy to watch, let alone play. And the boppy, bouncy music and affects only enhance the game further. My only niggle is that the collision detection is a little unforgiving at times, but with a game that's as addictive and fun to play as this, these things can be overlooked. Pang is a brilliant game that'll have you hooked from the word go - it's definitely one to get hold of at the first opportunity, mateys!

▼ The world is traversed by aeroplane as you clear the levels.

PICK A STAGE TO START OR
PRESS FIRE WHEN READY

▼ Caught between two mini bubbles!

▲ Leningrad's bubbles are red - well, what colour would they be?

The blocks in Emerald Temple cause some tricky bounces, so watch out!

▲ Notre Dame looms in the background on the Parisian level.

IN THE ARCADES

Pang wasn't an astonishing arcade success, but it still picked up a strong following of avid fans. And these people will be pleased to hear that Mitchell are about to release a new coin-op, Super Pang. Following the same basic gameplay, but with different backdrops and even more challenging gameplay, it requires the heroes to once again travel the world and free it from all rogue bubbles! Weird, man...

I'M FOREVER
BLASTING
BUBBLES

Some of the power-ups are useful, some not so. Here's a list of which to grab and which to avoid...

MAGNETIC CLAMP: Enables the hero's cable to stick to the ceiling or a platform. The cable then either disappears when a bubble comes into contact with it, or when it's been on screen for a set length of time.

MOUSEGUN: Useful for screens with many obstacles, but when used a lot of platforms, leave well alone.

DYNAMITE: Eek! This explodes anything on screen, turning it all into the smallest variety - which move like the clappers and are dead difficult to avoid!

TWIN CABLE: Yell handy power-up, it increases your rate of power, giving you more of a chance to hit sneaky smaller bubbles.

REVIEW

▼ If you clear the screen quickly you get a massive points bonus.

COMMENT

JULIAN

Pang is one of those incredibly simple, but amazingly addictive games which once you start playing you just can't stop. Combining detailed and smooth-moving graphics with irresistible gameplay, it's both challenging and enormously enjoyable. I know that bubble bursting doesn't sound particularly thrilling, but the action is fast and gets incredibly hectic, especially if you accidentally pick up the dynamite and end up with a screen full of moniacally bouncing mini-bubbles! On later levels icy floors make life difficult, and the bubbles move faster and faster, requiring much joytick-flogging and relax-lasting! Pang is easily the best GX4000 title yet seen, and is an absolute must-have if you've got such a machine.

WORLD WRESTLING

Ever fancied dipping your toes into the zany, Emedcap world of wrestling? Well, with this new Nintendo cart you can do just that, without the need to suddenly eat a massive lard mountain and put on a pair of ill-fitting, gaudy trunks. Tecmo's latest takes you to the USA, where the sport of wrestling has a slightly more theatrical air (indeed, most of the bouts seem to be scripted) and each of the participants seem to be violence crazed egomaniacs!

First of all, on the one-player game, a wrestler is chosen. After that there is the opportunity to take your muscle-bound mauler to the gym where those pecs can honed to perfection. Then it's into the ring itself where the real business of causing bodily damage to your opponent begins.

The object is pretty straightforward, either to hold down your opponent for the count of three, or beat him into submission.

▲ Oh come on! This is a family magazine!

COMMENT

MATT

It really disturbs me that such a blatantly violent game can be so fun! World Wrestling's greatest attraction is definitely the amount of moves crammed in. You really feel the pain when your on-screen character is unceremoniously thrown out of the ring and while out for the count mercilessly gets his knee straight in the family jewels!

Playing the game in two-player mode is where you have the biggest lotta, as the computer opponent won't really keep you that occupied for long. One to look out for, methinks.

▼ Impress the chicks with by visiting the gym

Synchronised breathing with NES wrestling! ▼

▼ Looks like the referee's been beaten up as well!

Looking at the screenshots, don't be misled. The graphics might look simple when they're static, but it's a different kettle of fish when they're moving - the animation is superb, and there are loads of neat touches like the spanging ropes and clambering back into the ring when you get chunked out! If you're after a thoroughly enjoyable game packed with loads of original features, wrestle this from your software dealer.

CHOOSE WRESTLER

RINGSIDE VIOLENCE

Good wrestlers are always resourceful, making the best use of their surroundings. Such is the case with World Wrestling, where our heroes have the ability to use the whole ring to their advantage. The posts particularly come in handy - not only for crashing your opponent's head against, but also for scaling and launching an airborne attack on your hapless foe! The action can also continue outside of the ring. Why not throw your opponent outside and finish him off with a jolly jumping knee-butt?

GET A GRIP ON YOURSELF

At the beginning of your game, a wrestler is selected. Each has a number of strengths and weaknesses and special attacks. All of the greatest wrestling moves have been crammed into this game, including that old favourite - the piledriver (turn your opponent upside down and slam his head into the canvas). Other moves include jumping knee-butts (jump into opponent's face with knee extended) and the obligatory clothes line, where an extended arm collides at speed with your opponent's neck!

A brilliant and amazingly playable wrestling game that even surpasses some arcade efforts! Check it out.

Those double-crossing alien sima have gone too far! In a fit of ruthless destruction they've completely taken over six strategically vital, horizontally scrolling sectors of Earth-Space and fortified them to the max. It's down to a real hero to go in and clean up the alien mess.

The whole of civilisation needs one man to pilot a Hellfire close attack craft into the danger zone and maul the whole of the alien fleet in a battle to the last. But these aliens aren't a bunch of thickies. They've drafted in the best battle-cruisers their alien money can buy, and add to that the terrifying legions of swarming alien craft - this isn't going to be easy!

But not everything alien is totally hostile. Certain alien craft are shot to release power-ups that provide Hellfire pilots with the necessary blasting power in order to overcome even the most well-armoured alien battle-craft. But it's not just the enormous enemy fleet that has to be destroyed. Marauding aliens don't hang about, and they've created plenty of nasty installations that are blasted in order to cleanse the sector of all alien occupation - as well as getting a huge amount of points into the bargain.

Even with a huge amount of mega-weaponry at the Hellfire's disposal, the aliens have still got one horrific trump card up their collective sleeve. They've created huge end-of-level guardians with one aim in life - to kill any plucky hero-types who think they can stand up to the alien empire!

▲ A shielded Hellfire blasts the mid-level guardian!

▲ Unbeatable shoot 'em up action with Hellfire.

▼ Rear fire picks off any devious aliens.

COMMENT

MATT

Toaplan's coin-op was simply superb and I'm glad to say that this Megadrive conversion not only captures the amazing graphics, sound and playability of the coin-op - but even adds to it! The music must get a special mention. The game's full of groovy tunes that suit the frenetic blasting action perfectly. Everything about the game is just so polished and feels so good - I defy you not to be addicted by this shoot 'em classic! Hellfire is a flamin' good arcade classic. Put it at the top of your shopping list - NOW!

GREY IMPORT WARNING

At present this is only available from Megadrive software importers and is NOT officially available from Sega in this country. This means that the game will work fine on Megadrives that have been imported from Japan, but will not work on official UK Megadrives unless you have a Japanese games adaptor (available from mail order import companies) or your machine has been modified (which we do not recommend you do as this invalidates your warranty).

POWER-UP TO PERFECTION

Across the six sectors of occupied space, Hellfire pilots learn the importance of collecting power-ups. There are a few different kinds of upgrade that can be collected and automatically installed on the Hellfire fighter.

SPEED-UP: Pretty much standard kit on all types of alien-mashing attack craft. Simply makes your craft fly with extra zip.

WEAPONS UPGRADE: In a universe populated with power-hungry alien slime, weapon upgrades can come particularly in handy. Collecting one of these from a fallen foe will endow your Hellfire's lasers with extra power - essential for the later sectors.

SUPER CANNON AMMO: Don't leave home without it. Extra ammunition for your super weapon will always be needed for the Hellfire pilot who is into serious alien carnage.

MULTIPLE: Not available to arcade Hellfire pilots, but included in this version. Doesn't fire as such, but homes in on anything alien and gives it a good kicking. A nice optional extra.

▲ A fully powered-up front cannon.

HELLFIRE ARCADE ACTION

Appearing in arcades last year, Toaplan's Hellfire didn't exactly *ask* the world alight when it was released. Perhaps it was the fact that graphically speaking, it wasn't the most exciting coin-op ever by any stretch of the imagination. But the original gameplay sat it apart from the norm, at a time when all that opposing arcade companies could come up with were tepid R-Type/Flying Shark clones. Needless to say, the arcade machine is virtually identical to the game reviewed here. Well worth the occasional 20p if you can find a machine in an arcade near you.

▲ The diagonal blasting rockets in motion!

▼ Olegonal fire helps keep the Hellfire out of trouble!

▲ Olegonal fire helps keep the Hellfire out of trouble!

REVIEW

COMMENT

My local arcade has a Hellfire coin-op, and many ten pence have I pumped into it - it's brilliant! And so is this conversion. It's not arcade perfect - in fact, it's arcade

JULIAN better. The graphics and sounds are indistinguishable from the original, but there are more weapons available than in the coin-op and two different difficulty levels! The gameplay is truly superb, and I love the four different modes of firepower. On later levels the badies attack from all directions, and you have to use them all to survive! If you've got an imported Megadrive and are after a superlative shoot 'em up, this is it!

THE HELLFIRE ARSENAL

Each and every Hellfire class fighter has four modes of firing and a Super Cannon fitted as standard (along with power-steering, central locking and go-faster stripes). Aspiring pilots and all-round Hellfire heroes must learn the good and bad points of each weapon.

FORWARD FIRING: Distinctive red death-dealing photons issue forth from the Hellfire's forward mounted cannon. Essential for the full-frontal (and most probably completely suicidal) attack.

REAR FIRE: Essential kit for the pilot who doesn't particularly enjoy enemy fighters queuing up to blast his butt away from under him.

VERTICAL FIRE: Firing both above and below the Hellfire, these laser cannons are just the biz for wiping out enemy installations without compromising the ship's safety.

DIAGONAL FIRE: Fires four laser bolts of true death in the four diagonal directions. A good all round weapon, covering a great deal of space.

SUPER CANNON: Not available to arcade Hellfire pilots, but included in this version. When the push comes to the shove, and those aliens seem most likely to blast you into your component atoms, one press of the C button releases a terrifying blaze of real Hellfire. Recommended as a last resort weapon only.

▲ There's a whole legion of these to kill!

▲ Batman picks up an extra life for tea.

Ever had one of those birthday parties where everything goes wrong? Gotham City's 200th Anniversary Festival has turned out like that. Criminals are in the middle of a spree, and the city is paralysed by violence and mayhem.

Of course someone's masterminding this diabolical scheme - Jack Napier, aka the Joker. It's up to one man (or flying rat, if you prefer) to stop him - Batman. With five stages, each divided into four levels, it's no easy task. There are fifteen types of handle and five death-dealing end-of-level bosses to be disposed of as the Caped Crusader hacks his way through to the final showdown with the Joker.

Aiding the Batman in his meanderings are numerous power-ups that are scattered around the landscape. These give extra points, more ammunition, or replenish life energy. As Batman can only take eight hits before exploding in a spectacular fashion, more energy is a must. As well as the standard punch the Batman picks up a spear gun, a Batarang, or a Dark (not Bogarde, but a shuriken thing) along the way. The bosses come in many shapes and sizes; Killer Moth, the Electrocuter, Firebug and would you believe it a Dual-Container Alarm all try to ruin Dark Knight's day. Die, and the joke's on you...

BATMAN

◀ PICTURES (C) TITAN BOOKS ▶

The man himself!

KNIGHT LIFE

The Batman hype explosion can be traced back to the man - Frank Miller. His comics series, *The Dark Knight Returns*, portrayed the Caped Crusader as a middle-aged man, sick of crime-fighting and retired from vigilante activities. The Joker escapes from a mental hospital and wreaks havoc in Gotham, forcing the anthro out of retirement. Meanwhile the evil President sets off a nuclear holocaust which Superman (the only "government approved" superhero) has to contain. Showing all the worst aspects of human nature, *Dark Knight* is a laugh from beginning to end - buy it now!

REVIEW

COMMENT

MATT

They make a brilliant Batman on the Nintendo has turned out to be a real event, with gameplay oozing from every pore (do cartridges have pores?). The graphics are well-defined and rather pretty also; and the army of foes, each with its own form of attack, puts this game way ahead of most NES games being released at the moment. The animated sequences - especially of the Batmobile - left me with my jaw aches they were so good. It's a shame that Betty doesn't have Batereaga from the word go, and has to rely on his flats, but that's just the psychopath in me coming out. For once, the TV advertising has some real muscle behind it, and if you are a Batman fan, this is a game at your peril.

▲ This way's dangerous - go up the wall on the

▲ Mind the electric field above you.

COMMENT

JULIAN

Sporting an extra chip which enhances the graphics, Batman is a visual treat. The backgrounds are a dark and brooding atmosphere so prevalent in the film. And it's not just a pretty face. The gameplay is platform-based, with loads of baddies to kapow and extra weapons to collect. There are 20 levels to beat, but the difficulty level is very nicely balanced and the gameplay is addictive enough to keep you coming back time and time again. Batman is expensive, but it's a first class cart that's deserving of any Nintendo owner's collection.

NO MORE MR NICE GUY

The baddies come thick and fast from the very first level: and they've all got silly names! Shakedown simply run at the hero and are easily zapped; Heatwaves use nasty flamethrowers in an attempt to barbecue the Batman, whereas Enforcers fly in on jetpacks. Later on Jader jumps up and down on our hero while Nightstayer nails him to the floor!

LASTABILITY 83%

OVERALL 87%

A classy licence through and through. If you own an NES you'd be bats to miss this - so there!

Feeling alone is something that happens to most people at some stage in their life. But for Danon, who lost all his friends and family when their craft collided rather terminally with the ground of a strange planet, this isn't your usual run-of-the-mill case. Raised by a local called Jimbe, Danon came home one day to find Jimbe dufted up so badly by the local baddie Gilbee the Damon he was nearly dead. So he went out to see Nial, a holy man (or hippy as they're sometimes known), and collect three sacred objects on the way.

Danon is a horizontally scrolling arcade adventure in which the hero travels through Amazon-style jungles, villages, a battleship, and a temple, in his quest to gather the three objects and defeat the demon Gilbee.

He can jump, crouch, and whip his chopper out and wave it menacingly at the enemies as he explores the landscapes, entering buildings and underground passages. Tokens are there for the taking, adding time, life points, magic, and experience points.

Talking to characters in the game provides clues and hints for later levels. With a boss at the end of each level, a *very* challenge is certain.

THE JUNGLE F

Platform signposting compels the way!

COMMENT

MATT

Jungle Fighter follows the classic arcade adventure path, but with no really original features. There's a lot to the game, and the graphics are attractive and reasonably animated - the tokens especially add to the gameplay. But at the end of the day, Denon doesn't grab the imagination - we've all seen this too many times before. The backgrounds are monotonous and the game's a lot too easy to provide excitement and a challenge. Still, it's worth a play if this is your cup of tea: if it isn't, try waiting for something with a little more comp!

GRAB YOUR BITS

There are tokens aplenty throughout the game, and while every one is worth snapping up, they are all guarded by nasties. Here's the list...

OXYGEN: Gives Danan longer in the underwater scenes.

MEAT: Restores vitality.

CLOCK: Adds time.

STARS: Provide experience points.

ARMADILLO: Smart bomb

▲ *Caution: Timing on the ladder is needed to not past the blinbo.*

▲ *Danan forms a close, loving relationship with the ladder.*

COMMENT

JULIAN

Similar in style to Rastan, but with more levels and a "talk to characters" option, Jungle Fighter is an enjoyable and straightforward horizontally scrolling hack 'n' slash game. There are a few niggling points, though. The landscapes are large, but the gameplay is a little bit tedious, since Danan can only do a few moves, and although the baddies are numerous, they're not particularly tough, allowing you to get quite far into the game very quickly. If you're a Rastan fan, give Jungle Fighter a go - but don't expect it to challenge you for long.

Constantly striving to bring you the latest in console coverage, **MEAN MACHINES** gives you a look at the latest Game Boy cartridges. Heck!

PAPERBOY

Riding a bike in America's heartland isn't as easy as it sounds. In fact it's downright lethal: dogs, burglars, cars and, would you believe it, ghosts conspire to make your delivery route as hazardous as possible. But the papers have to get through to the subscribers, and this version of the coin-op contains all the features of the original. Steer your bike past the hazards to avoid the sack!

Bonus points can be gained by smashing the windows of non-subscribers, and extra piles of tabloids are scattered around to help the unfortunate delivery boy. So don't freewheel, but pedal your heart out in this suburban

MATT: I can't say I thought this game is much cop. The original was buckets of fun, and the Master System version (see **MEAN MACHINES** Issue 1) is excellent. But it really doesn't work on this format - it needs colourful graphics, and the Game Boy, bless its little heart, just can't deliver that. **JAZ:** I don't like this - it's far too fiddly. You need to get your eyeballs out on stalks to work out who are subscribers and who aren't, especially with the ultra-blurry scrolling. Couple that with the rubbish bike controls and you've got a game that soon loses its appeal - even coin-op fans will be disappointed.

GAM ROUN

BATMAN

The caped crusader appears on the console scene once again, but in a totally different form from his previous incarnations.

This game is reminiscent of *Super Maneland*, as Batman jumps and shoots his way through the platform world. Along the way our nocturnal friend is molested by thugs, robots, and the Joker himself. There's even a Batwing section in which the Dark Knight shoots down 'copters. Don't forget to grab all the power-ups you can - you'll need them!

BOY ID-UP

NFL FOOTBALL

Sixteen! Forty eight! Hutt! The gridiron comes to the Gameboy together with all its interruptions and complicated rules. Play the computer or a friend with the Game Link - and choose any of the NFL teams that grab your fancy.

After kick off, the running back has to get as far upfield as possible until the opposition knocks him down. Then offensive plays are chosen in an attempt to gain 10 yards in four plays, which isn't as easy as it sounds. Alternatively while on defense, the task in hand is to prevent the other team from making their first down - and so regain possession. Punts and field goals are also available.

Big helmets, shoulder pads, and enormous salaries. It may sound like Dallas, but it's American Football!

MATT: A game this complex needs clear, straightforward graphics, not dozens of minute stick men lethargically wandering around the pitch. The potential's there, but the game fails to complete the play!

JAZ: Oh dear. When you look at the screen shots, this looks great. But once you see the crippled outcasts from a Lowry painting blurring their way around the screen like slugs you soon get put off. And when the action gets hectic, you end up with a writhing mass of pixels which you can't make head nor tail of. Give it a miss.

MATT: Another great Gameboy platform game, with a real sense of humour - the main sprite is hilarious! Not only that, but the play is superb; the locations all have a distinctive look, and the array of tokens to be collected makes for difficult decisions - so much the better!

JAZ: I like this a lot - it's sort of Super MarioLand with guns! MarioLand and Batman are very similar in appearance, but there's more variety in this. The graphics are excellent, and the gameplay is both challenging and addictive, and there are plenty of different weapons to try out. Highly recommended.

REVIEW

Nope, not a game about paramilitary sea marinals clapping and catching fish, the Navy SEALs are the US Navy's equivalent to our SAS - and they don't even smoke Embasies. Based on the Charlie Sheen film (yet to be released in the UK), the game involves a team of SEALs infiltrating a Middle Eastern country to rescue hostages, killing, maiming, and blowing things up on the way.

The action takes place over six levels, each based in an exotic location, such as a harbour, barracks, and a radio tower. Each team member can jump, somersault on to platforms, crouch and crawl - as well as shoot, of course. The idea is to travel through the level, planting bombs and splattering Johnny Arab Terrorist all over the landscape within the tough time limit. Eight lives are all you get, and the time isn't reset when a SEAL dies, so there's no hanging around!

Luckily power-ups are liberally dispersed through the levels, usually in the form of weapon upgrades including machine guns and flame throwers. Not an easy game, lots of effort is required to free the hostages for truth, justice, and the American way!

▲ The places to plant bombs are cunningly disguised with American flags.

COMMENT

MATT

Whoop! Gues who's made their game too difficult? There's no problem with a hard-to-beat game, but this Ocean offering's a just plain awkward to play. That's a shame, as there's a good game in there struggling to get out; and after the poor showing of Robocop II, I was hoping this would be the platform game to buy for the Amstrad. Still, it has its redeeming features; the animation of the hero swinging onto an overhead platform is superb, and it has that "just one more try" quality - although sometimes frustration makes you want to gal the cartridge and bang it out of the window. If you're not the most patient of players, think twice before buying.

SEALED WITH A KILL

The Navy SEALs movie stars Charlie Sheen, best known for his performances in *Platoon* and *Wall Street*, and Michael Bell, remembered as Reese in *Terminator*. The plot concerns a Navy helicopter that is shot down while on a jaunt through Beirut. The SEALs are sent to rescue their compatriots, and when they discover that the buddies have got their mitts on some nasty weapons (I wonder who sold the missiles to them?), they decide to annihilate the terrorists and escape. Unfortunately, the film hasn't been released yet in Britain - but it's expected to appear sometime in early next year.

REVIEW

▼ The ladder's your only choice.

▲ A good tactic is to quickly leap up from behind crates, gun blazing.

SEALS

▲ The second level - a Radio Tower.

▲ Back on the chain gang!

▲ A SEAL's flamethrower cuts swathes through the enemy.

PRESENTATION 80%

An opening screen displays all the levels, and the layout of the game is strong throughout

GRAPHICS 82%

The main sprites are all are cleverly animated, and the backgrounds are atmospheric

SOUND 76%

Rather unimpressive effects. The intro music is jolly, however, and adds atmosphere

PLAYABILITY 71%

The main sprite moves in a lethargic way, and the difficulty level makes it very hard to progress

LASTABILITY 77%

The game is big and tough, but the massive frustration level might mean you'll give up long before you reach the end

OVERALL 76%

A brilliant-looking game which has plenty going for it, but is marred by frustratingly hard gameplay

COMP

SEGA CHRIMBLE COMP!

It's Christmas, if you hadn't noticed, and those lovely people at Virgin/Master System have been completely and utterly bonkers and are literally throwing away prizes in this extra special Chrimble comp!

First prize in this super prize jamboree is the Sega Megadrive, which comes complete with joy stick, power supply and a copy of *Alien Breed*. Hurrah!

There's also a pair of second prizes in the form of Sega Master Systems. Double hurrah, with a side salad and extra mushrooms.

So what do you have to do to win one of these splendid prizes? We e-ell. Since it's Christmas, and you've got loads of time on your hands, we want you to draw us a map of your favourite game. Obviously, the better and more complicated the map the more chance you have of winning one of those lovely prizes! So get your special drawing trousers on, get playing your favourite game and make a map!

The winning maps will be published in a future edition of *MEAN MACHINES*, so not only will the winners get a fab prize, they'll also get all the fame and fortune of having their work published in this mega mag!

MEGADRIVE

It's the year 2089 and the ozone layer is being destroyed by human excess - just like it is today. The World's Presidents get together and agree to do research into making cyber human beings, normal humans with special skins immune to the deadly ultraviolet waves. However, one of the Presidents steals the plane and makes an army of superhumans with the intent of taking over the world.

The rest of the world retaliates with a plan codenamed Dynamite - a superhuman cyborg called Colonel Duke who's armed with a machine gun and a bionic arm and capable of taking on the army and destroying them single-handedly!

The action is displayed in first-person perspective 3D, and is played over six different levels, with Duke shooting and punching his way through hordes of marauding baddies. At the end of the last level is the evil President who controls the enemy army - destroy him and the threat to world peace is neutralised.

▲ Destroy the scenery to reveal hidden bonus items.

TRIPLE DUKE

Three versions of Selbu's Dynamite Duke appeared in the arcades. The original Duke was released in September 1980, and was followed three months later by a revised version of the game which featured different weapons and tweaked gameplay. A third version called Double Dynamite was released four months after that, featuring the same gameplay as the second game, but with a simultaneous two-player option.

PUNCH DRUNK

Duke is capable of doing a super dynamite punch. Just keep the fire button depressed until the power meter reaches its maximum and then let go to unleash a mega punch which destroys virtually anything!

▲ Duke's in deep trouble, so it's time for...

▲ ...a Dynamite punch to blow away the fiend!

▲ Avoid the clones and aim at the endroid

NUAR MACHINE 94

PacMan, perhaps the most famous arcade character of all time, is back – and this time he's brought his Dad. Well, no, he hasn't really, but this Master System version of the coin-op includes all the features of the original, plus some extra crunchy bits especially for you (as a certain crappy Os singer would say).

Featuring all four of the original levels – Block Town, PacMan's Park, Sandbox Land, and Jungle Gipsy – this forced perspective 3D game stars everyone's favourite happy yellow blob collecting dots that are scattered around the landscape.

Of course things are never that simple. Pursuing PacMan are a number of ghosts, all bent on bringing about his demise. Some ghosts track him by his trail, others by working out where he is at present. Luckily our hero can jump, and neatly evade the nasties – if the hand on the joystick is quick enough.

From what we've seen so far, Pacmania is shaping up to be one of the hottest Master System games in a long while. Look out for a full review early next year.

◀ Block Town in all its glory!

Looks like our hero's in a bit of a tight spot.

PAC MANIA

Launched in 1982, Namco's PacMan coin-op was a phenomenal success - machines popping up everywhere from arcades to shops! Its simple, non-violent, brain-teasing gameplay bringing huge numbers of female gamers into arcades for the first time, and traditional arcadesters easily. Spin-off merchandising appeared from all quarters, including PacMan clocks, cuddly toys, sweats, towels, clothes, wallpaper, bed sheets... You name it, it had PacMan on it!

YOB'S

YOB's been sneaking around, digging up the latest rumours and scandals for your delectation! What's been going on this month? Well, read on and see...

I'M A LITTLE PIXIE

A mole at IDG, the company who are responsible for the upcoming Tecmepik Sega titles (I trust if you've already seen the Pacmania preview) has told me the nickname of their PR person, Nicky Hemming. It's none other than "Pixie". Strange, but true.

BUNKING AROUND PARIS

When French software company Titus organised to take a gaggle of Journalists over to see them in Paris, there were many smiles in evidence. However, little did they know what horrors were in store...

First of all, the cab from the airport to the Titus offices cost a meagre £40.00. "Never mind", thought the hacks, "at least the trip back to the hotel for the overnight stay would be straightforward?" Not likely. The assembled press were bundled into the back of the Titus delivery van, because there were no taxis near their offices, and dumped off at the nearest railway station, where the Titus PR person informed them to jump over the barriers without getting a ticket because "very few people get caught". At least one honest journo purchased a ticket...

When the journos finally got to the hotel, expecting a relaxing evening's sleep, they discovered that the broom cupboards posing as bedrooms had been wrongly booked for two couples rather than four individuals, resulting in the journeé having to get to know one another rather better than they'd hoped! Oh well...

MASTERMIX VIDEO

The Sega "Do Yourself a Favour" Mastermix (that was given away free on the cover of last month's MEAN MACHINES) has been so amazingly well received that Virgin/Mastertonic are considering making a video to go with the song! Next stop Top of the Pops and MTV!

KISS MY SEGA!

If you're a radio listener and regularly tune in to Kiss FM, you'll be interested to hear that all the DJs at the station are completely and utterly mad about Sega! In fact, they're so mad about Sega consoles that they're going to be organising a mega Sega competition. So keep listening - I'll try and find out more about it and bring you a further report

PRESENTATION 61%

Pretty latty! An unshaven muck, clothes from Marks 'n' Spencer and trousers with holes in the bottom.

GRAPHICS 99%

Very good actually. Our Gaz can draw like a demon - just check out the cover and pictures in the magazine!

SOUND 57%

Mostly quiet winging noises, but occasionally the odd crow when he gets a highscore.

PLAYABILITY 73%

Easy to get into, he's a simple person - just wind him up and watch him go.

LASTABILITY 72%

Not very long, unfortunately.

OVERALL 73%

Excellent graphics let down by poor presentation and slightly ropey sound. Still, shows plenty of promise.
